

With automatic transmission, selecting **N** from **R** will keep front and rear sensors active.

When objects are detected, the parking aid emits a warning tone which increases in frequency as the vehicle gets closer to the object and then becomes constant when the obstacle is within 12 in (300 mm).

Note: The front parking aid provides an audible proximity warning when driving forwards and when reversing.

PARKING AIDS DISABLED

The rear sensors are automatically disabled when a trailer with an approved electrical connector is connected or if a rear fitted accessory is within sensor range.

Note: Trailers fitted with LED lights will not disable the rear parking aids sensors. When reverse gear is selected, the attached trailer will be detected as an obstacle.

PARKING AIDS SYSTEM FAULT

If a system fault is detected, a long high-pitched tone will sound and the switch indicator will flash. A message will be displayed in the message center. Contact your Retailer as soon as possible.

REAR CAMERA

WARNING

Always turn and look before reversing. It remains the driver's responsibility to detect obstacles and estimate the vehicle's distance from them when reversing.

When Reverse (**R**) is selected the rear camera provides a wide-angle rear view color image on the touch screen.

The rear camera display has priority over the Parking aids display.

To adjust the camera settings, select **Extra features**, from the home menu, select **Cameras** and then **Settings**.

The display also incorporates graphic overlays, indicating vehicle direction, width and proximity to surrounding objects.

SL2284

- A. Solid line: The projected path based on current steering wheel position.
- B. Dotted line: The safe working width of the vehicle (including exterior mirrors).
- C. Tailgate access guideline: Do not reverse beyond this point if tailgate access is required.
- D. Parking sensor activation: A colored area appears, to indicate which rear sensor(s) has been activated.
- E. User option. Touch to enable/disable A, B & C.
- F. User option. Touch to enable/disable D.

Parking aids

- G.** User option. Touch to enable/disable Hitch Assist guidance lines.

NOTICE

Some overhanging objects or barriers which could cause damage to the vehicle, may not be detected by the camera.
