

PARTS AND ACCESSORIES

WARNING

The fitting of non-approved parts and accessories, or the carrying out of non-approved alterations or conversions, may be dangerous and could affect the safety of the vehicle and occupants and also invalidate the terms and conditions of the vehicle warranty.

WARNING

Land Rover will not accept any liability for death, personal injury or damage to property which may occur as a result of fitment of non-approved accessories or the carrying out of non-approved conversions to Land Rover vehicles.

WARNING

Under no circumstances should any part of the air conditioning system be serviced, dismantled or replaced by anyone other than suitably qualified and certified personnel. Always ensure the correct containment of the refrigerant at all times.

WARNING

All replacement parts for the air conditioning system should be new and equivalent to the manufacturer's original equipment while complying with the SAE Standards. Contact your Retailer/Authorized Repairer for advice.

AIR BAG SYSTEM

WARNING

The components that make up the air bag system are sensitive to electrical or physical interference, either of which could easily damage the system and cause inadvertent operation or a malfunction of the air bag module.

WARNING

Certain components of this vehicle such as air bag modules and seat belt pretensioners may contain Perchlorate Material - Special handling may apply for service or vehicle end of life disposal. See www.dtsc.ca.gov/hazardouswaste/perchlorate.

To prevent malfunction of the air bag system always consult your Land Rover Retailer/Authorized Repairer before fitting any of the following:

- Electronic equipment such as a cell phone, 2-way radio or audio system.
- Accessories attached to the front of the vehicle.
- Any modification to the front of the vehicle.
- Any modification involving the removal or repair of any wiring or component in the vicinity of any of the air bag system components, including the steering wheel, steering column, instrument or facia panels.
- Any modification to the facia panels or steering wheel.

OWNER MAINTENANCE

NOTICE

Any significant or sudden drop in fluid levels, or uneven tire wear, should be reported to a qualified technician without delay.

In addition to the routine maintenance, a number of simple checks must be carried out more frequently.

DAILY CHECKS

- Operation of lamps, horn, turn signals, wipers, washers and warning lamps.
- Operation of seat belts and brakes.
- Look for fluid deposits underneath the vehicle that might indicate a leak.

WEEKLY CHECKS

- Engine oil level.
- Engine coolant check.
- Brake fluid level.
- Dynamic response fluid level.
- Windshield washer fluid level.
- Tire pressures and condition.
- Operate air conditioning.

Note: *The engine oil level should be checked more frequently if the vehicle is driven for prolonged periods at high speeds.*

ARDUOUS DRIVING CONDITIONS

When a vehicle is operated in extremely arduous conditions, more frequent attention must be paid to servicing requirements.

Arduous driving conditions include:

- Driving in dusty and/or sandy conditions.
- Driving on rough and/or muddy roads and/or wading.
- Driving in extremely hot conditions.
- Towing a trailer or driving in mountainous conditions.

Contact a Land Rover Retailer/Authorized Repairer for advice.

ROAD TESTING DYNAMOMETERS (ROLLING ROADS)

It is essential that any dynamometer testing is carried out only by a qualified person, familiar with the dynamometer testing and safety procedures practiced by Land Rover Retailer/Authorized Repairers.

SAFETY IN THE GARAGE

⚠ WARNING

If the vehicle has been driven recently, do not touch the engine, exhaust and cooling system components until the engine has cooled.

⚠ WARNING

Never leave the engine running when the vehicle is in a garage. Exhaust gases are poisonous and can cause unconsciousness and death if inhaled.

⚠ WARNING

Do not work beneath the vehicle with the wheel changing jack as the only means of support.

⚠ WARNING

Keep your hands and clothing away from drive belts, pulleys and fans. Some fans may continue to operate after the engine has stopped.

⚠ WARNING

Remove metal wrist bands and jewellery, before working in the engine compartment.

⚠ WARNING

Do not touch electrical leads or components while the engine is running, or with the ignition turned on.

⚠ WARNING

Do not allow tools or metal parts of the vehicle to make contact with the battery leads or terminals.

FUEL SYSTEM

⚠ WARNING

Under no circumstances should any part of the fuel system be dismantled or replaced by anyone other than a suitably qualified vehicle technician.

⚠ WARNING

Ensure sparks and naked lights are kept away from the engine compartment.

⚠ WARNING

Wear protective clothing, including, where practicable, gloves made from an impervious material.

POISONOUS FLUIDS

Fluids used in motor vehicles are poisonous and should not be consumed or brought into contact with open wounds.

For your own safety, always read and obey all instructions printed on labels and containers.

USED ENGINE OIL

Prolonged contact with engine oil may cause serious skin disorders, including dermatitis and cancer of the skin. Always wash thoroughly after contact.

It is illegal to pollute drains, water courses or soil. Use authorized waste disposal sites to dispose of used oil and toxic chemicals.

OPENING THE HOOD

E142618

1. Pull the hood release lever, located in the left-hand front footwell.
2. Pull the hood safety catch lever, located underneath the center of the hood at the front, then raise the hood.

CLOSING THE HOOD

⚠ WARNING

Do not drive with the hood retained by the safety catch alone.

1. Lower the hood until the safety catch engages. Using both hands, press the hood down until the catches click.
2. Check that both catches are engaged, by trying to lift the front edge of the hood.

ENGINE COMPARTMENT OVERVIEW

1139199

1. Engine oil filler cap.
2. Brake fluid reservoir cap.
3. Windshield washer fluid filler cap.
4. Dynamic response fluid reservoir cap.
5. Engine coolant filler cap.

⚠ WARNING

While working in the engine compartment, always observe the safety precautions. See 192, SAFETY IN THE GARAGE.

⚠ WARNING

Do not drive if there is a possibility that leaked fluid will come into contact with a hot surface, such as the exhaust.

UNDER HOOD COVERS - REMOVAL

E149665

1. Release and remove the 4 turnbuckle clips securing the cover.
2. Lift the front edge of the cover and slide forwards to remove.

UNDER HOOD COVERS - REFITTING

NOTICE

Before refitting the under hood covers, ensure that no pipes, cables or other items, have been trapped between the cover and casing.

1. Place the cover over the casing, ensuring the 4 holes are aligned.
2. Push the cover down firmly and fasten the 4 turnbuckle clips.

UNBLOCKING WASHER JETS

⚠ CAUTION

Do not operate the washer jets during unblocking or adjustment. Windshield washer fluid may cause irritation to the eyes and skin. Always read and observe the washer fluid manufacturer's instructions.

If a washer jet becomes blocked, use a thin strand of wire to unblock the jet by inserting the wire into the jet. Ensure that the wire is completely removed after unblocking. The washer jet position may also be adjusted by inserting the point of a needle into the jet and gently repositioning it.

CHANGING A BULB

NOTICE

All lamps are either LED or Xenon units and must only be replaced by a Land Rover Retailer/Authorized Repairer.

WIPERS SERVICE POSITION

Before changing a front wiper blade, the wiper arms must be set in the 'service' position as follows:

Note: *The Smart Key must remain in the vehicle while wiper blades are replaced.*

1. Ensure that the ignition is turned off.
2. Turn the ignition on then off again.
3. Immediately push the wiper control down to start the single wipe operation and turn on the ignition again.

The wipers will move to their service position.

4. When the new parts have been fitted, turn the ignition off. This will return the wipers to park position.

WINDOW RESET

The windows will need to be reset if the battery is disconnected, becomes discharged or power supply is interrupted.

Reset as follows:

1. Close the window fully.
2. Release the switch, then lift it to the close position and hold for 1 second.
3. Repeat the procedure on each window.

SUNROOF RESET

If the battery is disconnected or the power supply is interrupted while the sunroof is partially open, it will need to be recalibrated.

Once the battery is reconnected or the power supply is restored, recalibrate the sunroof as follows:

1. Switch the ignition on.
2. With the roof and blind closed, press the front of the roof switch and hold for 20 seconds. See **56, ELECTRIC WINDOWS**.
3. After 20 seconds, the sunroof will begin to move. Release the switch. Within 5 seconds press and hold the front of the roof switch until the blind and roof complete a full open/close cycle.

Note: *The blind will open first and close last.*

4. Once the blind has stopped moving, release the switch.

The sunroof can now be operated as normal.

CLEANING THE EXTERIOR

⚠ CAUTION

Following cleaning of the vehicle exterior (particularly with a pressure washer), it is recommended that the vehicle is taken for a short drive to dry out the brakes.

NOTICE

Some high pressure cleaning systems are sufficiently powerful to penetrate suspension joints, door/window seals and damage trim and door locks. Never aim the water jet directly at the engine air intake, heater air intakes, body seals (doors, sunroof, windows etc.) or at any components which may be damaged (lights, mirrors, exterior trim, suspension seals and gaiters, etc.). Make sure that the pressure washer nozzle is always at a distance of more than 12 inches (300 mm) from any component of the vehicle.

NOTICE

Do not use a power wash system in the engine bay area as it may cause damage.

NOTICE

Ensure that you read and comply with all warnings and product instructions supplied with any cleaning products.

NOTICE

Never use cleaning products that are not approved for use on vehicles.

NOTICE

Substances which are corrosive, such as bird droppings, can damage the vehicle's paintwork and should be removed as soon as possible.

UNDER BODY MAINTENANCE

Regularly flush the underbody with plain water, and pay particular attention to areas where mud and debris collect.

If damage or corrosion are detected, have the vehicle checked by a Land Rover Retailer/ Authorized Repairer as soon as possible.

CLEANING AFTER OFF-ROAD DRIVING

NOTICE

Ensure that the areas around air intakes and the front grille are clean and clear of debris. Pay particular attention to the lower grille and radiator. Failure to do so may cause the engine to overheat, leading to severe engine damage.

Ensure that the vehicle underside is cleaned as soon as possible after driving off-road.

E142571

To improve aerodynamics, the vehicle is fitted with active vanes that open only when the engine temperature rises or when the air conditioning is turned on. The active vanes must be opened manually to allow access to clean any debris from the radiator and the air conditioning condenser after off-road driving.

1. Start the engine and allow it to run for a few seconds. See **101, STARTING THE ENGINE**.
2. Switch off the engine.
3. Switch on the ignition. See **101, SWITCHING ON THE IGNITION**.
4. Select Sand mode on the Terrain response system. See **137, TERRAIN RESPONSE OPERATION**.

5. Switch off the ignition.
6. Using a hose pipe, direct clean water through the front bumper (where shown) to remove mud from the radiator and air conditioning condenser.

CLEANING THE INTERIOR

⚠ CAUTION

Some cleaning products contain substances that are harmful and can cause health problems if used incorrectly and may cause damage to the interior.

CLEANING FABRIC UPHOLSTERY

⚠ WARNING

Do not polish the instrument panel. Polished surfaces are reflective, and may interfere with the drivers view.

Clean plastic or cloth faced surfaces with warm water and non-detergent soap. Then wipe clean with a soft cloth.

CLEANING LEATHER UPHOLSTERY

NOTICE

Only use cleaning products specifically designed for use on leather. Do not use chemical, alcohol, or abrasive materials, as they will cause rapid deterioration of the leather. The use of products which are not approved will invalidate your warranty. If you are in any doubt as to which products to use, consult your Land Rover Retailer/ Authorized Repairer.

NOTICE

Some materials/fabrics are prone to dye transfer, which can cause unsightly discoloration of lighter colored leathers. Affected areas should be cleaned and re-protected as soon as possible.

Leather should be cleaned and protected at least every 6 months.

To prevent ingrained dirt and staining, inspect the seat upholstery regularly, and clean every 1 to 2 months as follows:

1. Wipe off fine dust from the seat surfaces using a clean, damp, non-colored cloth. Avoid over wetting the leather.
2. If this is not sufficient, use a cloth which has been dampened with warm soapy water and then wrung out. Use only mild non-caustic soap.
3. Use Land Rover leather cleaner for heavily soiled areas. Dry off and rub the with a clean soft cloth, changing surfaces regularly.

Use Land Rover leather cleaner several times a year to maintain the leather's suppleness and appearance. The cleaner will nourish and moisturize and help to improve the surface protection film against dust and substances.

- Dark clothing may stain leather seats just like other upholstery products.

- Sharp objects such as belts, zippers, rivets etc can leave permanent scratches and scratch marks on the leather surface.
- Unless spillages such as tea, coffee or ink are washed away immediately, permanent staining may have to be accepted.

If a valet service is used, ensure that the specialist concerned is aware of, and follows, these instructions precisely.

CLEANING THE SEAT BELTS

⚠ WARNING

Do not allow any water, cleaning products, or fabric from cloths to enter the seat belt mechanism. Any substance which enters the mechanism may affect the performance of the seat belt in an impact.

Extend the seat belts fully, then use warm water and a non-detergent soap to clean. Allow the seat belts to dry naturally while fully extended.

Note: While cleaning the seat belt, take the opportunity to examine the webbing for damage/wear. Any wear or damage should be reported to, and rectified by, a Land Rover Retailer/Authorized Repairer.

AIR BAG MODULE COVERS

⚠ WARNING

Air bag covers should only be cleaned using a slightly dampened cloth, and a small amount of upholstery cleaner.

⚠ WARNING

Do not allow the air bag covers, or surrounding areas, to become contaminated with liquids. Any substance which enters the mechanism can prevent correct deployment of an air bag during an impact.

CLEANING THE TOUCH SCREEN

- Clean with a lightly moistened cloth.
- Do not use chemical agents or domestic cleaners.
- To prevent errors occurring, ensure that only 1 finger at a time is in contact with the screen.
- Do not use excessive pressure.
- Do not allow sharp, hard or abrasive objects to make contact with the screen.
- Avoid exposing the screen to direct sunlight for long periods.
