Quick start

REMOTE CONTROL

1. Key release button.
2. Lock button: Press once to lock all doors and activate the perimetric alarm. Press twice within three seconds to deactivate the interior space protection and tilt sensor.
3. Unlock button: Press once to deactivate the alarm and unlock the driver’s door (Single point entry). Press again to unlock the remaining doors.
4. Land Rover button: This is customer configurable, and can be programmed to remotely operate one of the following functions. See PROGRAMMING THE REMOTE CONTROL (page 39).
   - Headlamp on (default).
   - Panic alarm.
   - Air suspension.

Single point entry
This is a security feature that unlocks only the driver’s door. It can be disabled on individual remote controls by simultaneously pressing and holding the lock and unlock buttons for three seconds. The vehicle will lock and then unlock in the currently selected mode to confirm the change. You can now unlock all doors with a single press. Repeating the procedure will re-enable Single point entry.

Partial arming
If an aperture (door, bonnet or tailgate) is not fully closed when the remote control lock button is pressed, the horn will sound briefly to signal that an aperture is still open. The alarm will remain disarmed and all of the closed apertures will lock. As soon as the open aperture is closed, the system will automatically arm, signalled by three flashes of the hazard warning lamps, with interior space protection activating 30 seconds later.

Automatic relock
If the vehicle is unlocked with the remote control, it will automatically relock and arm the alarm if a door or the tailgate is not opened within one minute.

Key blade
Press button (arrowed in illustration) to release the key blade.

Remote control battery
The remote control battery should never need replacement. The battery is recharged whenever the key is in the starter switch and the engine is running.
Quick start

CENTRAL LOCKING

Master lock and unlock switches

1. Press to unlock all the doors and the tailgate.
2. Press to lock all the doors and the tailgate.
3. Press and hold both buttons for three seconds to release the tailgate.

Speed-related locking
If enabled, the doors and tailgate will automatically lock when the vehicle’s speed exceeds 8 km/h (5 mph). This feature can be disabled or enabled in the Settings option accessed via the trip computer.

TAILGATE

Opening the tailgate
With all the doors unlocked, press the release button (1) on the tailgate to release. The tailgate incorporates a Power closure feature, which removes the need to slam the tailgate when closing.

Opening the tailglass
With all the doors unlocked, press the touch pad (2) on the exterior handle and pull to open.

Note: If the tailgate is locked or unlocked 10 times within a short period, the latch will be disabled for approximately one minute, to protect the battery and lock mechanism.
Quick start

BONNET

Opening
Pull the bonnet release lever (1).
Lift the bonnet safety catch lever (2), and raise the bonnet.

Closing
Lower the bonnet until the safety catch engages. Using both hands, press the bonnet down until the catches click.
Check that both catches are engaged by trying to lift the front edge of the bonnet.

DRIVER’S POWER OPERATED SEAT ADJUSTMENT

1. Backrest adjustment switch.
2. Seat forwards/backwards and cushion height control switch.
3. Lower backrest lumbar support switch.
The position of the seat can be adjusted when the starter key is in position I or II.
In addition, the seats have a 15 minute (10 minutes for a driver’s seat with seat memory) active period initiated when the vehicle is unlocked, or the starter key is turned to position 0.
Quick start

DRIVING POSITION MEMORY
The vehicle can store individual seat, exterior mirror and steering column settings.

1. Press the memory store button (1) to activate the memory function for five seconds.
2. Press one of the preset buttons (2) to store the current seat and mirror position.
   MEMORY STORED will be displayed on the message centre accompanied by an audible chime to confirm the settings have been memorised.
   Note: A seat position will only be memorised during the five second active period. Any existing settings will be over-written when programming a memory position.
To recall a stored driving position, press the appropriate preset button (2).

Lazy entry
This feature enables the vehicle to store the seating and mirror positions for each remote control.
When the vehicle is unlocked using a remote control, the position of the seat and mirrors will adjust to the last used position. This feature can be disabled or enabled in the Settings option accessed via the trip computer.

WINDOWS AND DOOR MIRRORS

• To open a window, press and hold the respective switch.
• To close a window, pull and hold the switch.
Window movement can be stopped at any time by releasing the switch.
Both front windows have a one touch facility that allows them to be fully opened or closed with a single operation of the switch. Firmly press the switch and release. Movement can be stopped by briefly pressing the switch again.
Press the right-hand side of the switch (1) to inhibit the operation of the rear window switches.

Resonance with lowered windows
If a resonance or booming sound occurs when a rear window is open, lowering an adjacent front window about 25 mm (1 inch) will eliminate the condition.

Door mirror adjustment
To adjust the mirrors, rotate the mirror adjustment knob (2) left or right to select the mirror. Move the knob in any direction to adjust the position of the mirror glass.
Quick start

Power fold mirrors
With the mirror adjustment switch knob in the central position, push the knob downwards to fold or unfold the mirrors.

Reverse automatic mirror dip
When reverse gear is selected the door mirrors will dip. The dip position of the door mirrors can be personalised. See ELECTRIC EXTERIOR MIRRORS (page 104).
This feature can be disabled or enabled in the Settings option accessed via the trip computer. See TRIP COMPUTER (page 109).

STEERING COLUMN ADJUSTMENT

Manual adjustment
1. Move the lever located under the steering wheel fully downward.
2. Adjust the height and reach of the steering wheel to the desired position.
3. Move the lever fully up to lock the position of the wheel.

Electric adjustment

<table>
<thead>
<tr>
<th>WARNINGS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Never adjust the steering wheel position while the vehicle is in motion. Doing so will reduce control of the vehicle, and may cause unpredictable steering movements.</td>
</tr>
</tbody>
</table>

The steering wheel can be adjusted in four directions, corresponding with the movement of the adjustment control, to suit your driving position.
Quick start

SUNROOF

To open and close the sunroof:
• Press and release the rear of the switch (1) to open the roof fully.
• Press and release the front of the switch (2) to close the roof.
To tilt the sunroof:
• Press and release the front of the switch (2) to open the roof to the tilt position.
• Press and hold the rear of the switch (1) to close the roof fully.
If the sunroof is moving, it can be stopped by pressing the switch again.

Operating note
The sunroof can be operated with the starter key in position I or II and for 40 seconds after position 0 has been selected, providing that neither front door has been opened. With the starter key in position I or 0, the switch will need to be pressed and held until the roof reaches the desired position.

SEAT BELT AND CHILD RESTRAINTS

A warning light on the instrument pack will illuminate to alert you that the driver’s or front passenger’s seat belt is unbuckled. Dependent upon specification this may be accompanied by an intermittent chime.

Automatic Locking Reels (ALR)
All passenger seat belts have ALR fitted for use with child seats or securing large items.
• To engage: extend seat belt to maximum length to enable locking mechanism.
• Allow seat belt to retract onto the child seat/large item (a clicking sound will be heard as the belt retracts). Ensure there is no slack by pressing the seat/item firmly into the vehicle seat.
• To disengage: unbuckle belt and allow belt to fully retract.

Operating note
With ALR enabled, as the seat belt retracts, it will automatically lock, preventing re-extension.
Ensure passengers do not fully extend the restraints and inadvertently engage this feature during normal use.

CHILD SEATS
It is important to remember that the child’s weight, rather than age, determines the type of seat that is required. See CHILD SEATS (page 67).

Recommended child seat
Land Rover strongly recommends the use of ISOFIX child seats. ISOFIX child seats can only be fitted in the second-row outer seating positions.
PASSENGER AIRBAG DEACTIVATION

If it becomes necessary to fit a child restraint on the front passenger seat, the passenger airbag must be deactivated.

To deactivate the airbag, open the front passenger door and use the starter key to turn the PASS AIRBAG switch (located on the end of the facia) to the OFF position.

With the airbag deactivated, the status indicator (arrowed in illustration) will illuminate whenever the starter key is turned to position II.

Operating note
When an adult is seated in the front passenger seat, ensure the PASS AIRBAG switch is turned to the ON position.
HEATING AND VENTILATION
These are the primary functions of the heating and ventilation system.

**AUTO (automatic) mode**
Press AUTO to select automatic operation of the system, both LEDs in the switch will illuminate. The system will adjust the heat output, blower speed, air intake and airflow distribution to maintain the selected temperature(s) and reduce misting without further adjustments. The air distribution and blower controls can be operated to override the automatic settings. This will extinguish the appropriate LED in the AUTO control.

**Recommended mode**
Select AUTO as the normal operating mode. This will help prevent window misting and eliminate odours from the climate control system.

**External water deposits**
The air conditioning system removes moisture from the air and deposits excess water beneath the vehicle. Puddles may form, but this is normal and no cause for concern.

**Temperature selection**
Rotate the controls 1 to adjust the temperature for the respective side of the passenger compartment.

**Operating note**
It is not possible to achieve a temperature differential of more than 4°C (7°F) between the left and right.

**Blower speed**
Rotate the blower control 2 to adjust airflow through the vents. As the control is adjusted, LEDs will illuminate to indicate which of the eight possible speeds is currently selected.
Quick start

**Air distribution control**
Press to select the desired distribution setting. An LED will illuminate in the switch. An LED will illuminate in the switch.

- **Windscreen and side window vents**
- **Face level vents**
- **Foot level vents**

More than one setting can be selected to achieve the desired distribution.

**OFF**
Press to switch the system off. An LED will illuminate in the switch to show this condition. Press again to return the system to its previous operating mode. The system will also be reactivated by using the AUTO, blower speed, air distribution or defrost controls.

**Defrost mode**
Press to remove frost or heavy misting from the windscreen. The system will automatically adjust the blower output for maximum clearing, in addition the rear window and windscreen heaters will be activated. Press again to switch off defrost mode. The rear screen and windscreen heaters will remain on.
Press again to switch off defrost mode. The rear screen and windscreen heaters will remain on.

**Air recirculation**
Press once to activate air recirculation. An LED will illuminate in the switch. Press again to return to fresh air intake.

**Economy mode**
Press to put the system into economy mode. An LED will illuminate in the switch to show this condition.
In economy mode air conditioning is switched off. This reduces the load on the engine, thereby improving fuel consumption.

**Heated windscreen and rear window**
Press to operate. An LED in the switch will illuminate whilst operating.
The heaters will automatically switch off after a preset interval.

**Seat heaters**
Press the relevant button to operate the required seat heater at high level. Both LEDs will illuminate.
Press a second time to heat the seat at a lower level. One LED will extinguish.
Press a third time to switch off.
Quick start

ATTENTION WARNING INDICATORS
If any of the following illuminates whilst driving a fault has been detected. Refer to the individual pages given below for further information.

- Battery charge indicator. See GENERAL DRIVING POINTS (page 146).
- Low oil pressure. See GENERAL DRIVING POINTS (page 146).
- Electric Parking brake. See ELECTRIC PARKING BRAKE (EPB) (page 141).
- Brake systems. See PRINCIPLE OF OPERATION (page 138).
- Anti-lock braking system. See HINTS ON DRIVING WITH ABS (page 140).
- Airbag system. See AIRBAG WARNING LAMP (page 66).
- Engine. See REDUCED ENGINE PERFORMANCE (page 148).
- Suspension system. See PRINCIPLE OF OPERATION (page 168).
Quick start

Dynamic Stability Control (DSC). See USING STABILITY CONTROL (page 158).
Adaptive front lighting system. See ADAPTIVE FRONT LIGHTING SYSTEM (AFS) (page 80).
Tyre Pressure Monitoring system. See TYRE PRESSURE MONITORING SYSTEM (page 236).

INFORMATION WARNING INDICATORS
The following will illuminate during normal driving to indicate that a particular system or feature is operating.

- Seat belt reminder. See SEAT BELT REMINDER (page 58).
- Diesel glow plugs active. See STARTING THE ENGINE (page 128).
- Low gear range selected. See TRANSFER GEARBOX (page 135).
- Hill Descent Control (HDC) active. See USING HDC (page 160).
- Cruise control active. See USING CRUISE CONTROL (page 149).
- Adaptive cruise control active. See USING ACC (page 152).
- Direction indicator. See DIRECTION INDICATORS (page 82).
- Trailer direction indicator. See TOWING A TRAILER (page 184).
- Headlamp high beam on. See LIGHTING CONTROL (page 78).
- Side lamps on. See LIGHTING CONTROL (page 78).
- Rear fog lamps on. See REAR FOG LAMPS (page 79).
- Front fog lamps on. See FRONT FOG LAMPS (page 79).

STEERING COLUMN LEVERS

Windscreen wiper
1. Intermittent wipe or rain sensor
2. Normal speed operation
3. High speed operation
4. Single wipe - press and release to operate
5. Rotate collar to adjust the speed of the intermittent wipe or sensitivity of the rain sensor (if fitted).

Windscreen washer
Push the button on the end of the lever to operate the windscreen washer.

Rear wiper and washer
Pull the lever to position 6 for intermittent operation of the rear wiper. Pull and hold the lever in position 7 to operate the rear washer and wiper.
Quick start

Direction indicators and Headlamp high beam

Move the lever up or down to activate the direction indicators.

Moving the lever up or down against spring pressure and then releasing will flash the indicators three times. Useful for lane changing.

Push the lever away from you to select headlamp high beam. A blue warning indicator will illuminate on the instrument pack.

Trip computer

Press the button on the end of the lever to cycle through the trip computer functions displayed on the message centre.

EXTERIOR LAMPS MASTER SWITCH

1. Exterior lamps off
2. Side lamps
3. Headlamps
4. Autolamps
5. Front fog lamps (if fitted)
6. Rear fog lamps

If front fog lamps are not fitted, the rear fog lamps will come on at position 5.

In AUTO mode and the starter switch in position II, a sensor monitors the exterior light levels and will automatically switch the side lamps and dipped headlamps on and off as required.

Note: Fog lamps cannot be operated if the lamps master switch is in AUTO.
Quick start

ELECTRIC PARK BRAKE (EPB)

Applying
With the vehicle stationary, pull up the parking brake lever and then release it. The red warning indicator in the instrument pack will illuminate.

Releasing
The starter switch must be in position I or II. Apply the foot brake and press down on the parking brake lever.
If the vehicle is stationary with the parking brake applied and either D (Drive) or R (Reverse) selected, pressing the accelerator will automatically release the parking brake.

AUTOMATIC TRANSMISSION

Gearshift interlock
The starter switch must be in position II, the foot brake applied and the selector release button pressed before the gear selector can be moved from P (Park) to R (Reverse).
The gear selector must be in the P position before the starter key can be removed.

Sport mode

<table>
<thead>
<tr>
<th>Operating note</th>
</tr>
</thead>
<tbody>
<tr>
<td>If Terrain Response is fitted, Sports mode is only available when the General program is selected.</td>
</tr>
</tbody>
</table>

In Sport mode, automatic gear changing is maintained but the gearshift changes are modified to improve performance.
To select Sport mode, move the gear selector from D towards the left hand side of the vehicle.
SPORT will appear on the instrument pack display and the LED in the gear selector surround will illuminate.

<table>
<thead>
<tr>
<th>Operating note</th>
</tr>
</thead>
<tbody>
<tr>
<td>When Sport is selected, the transmission will stay in lower gears for longer with downshifts occurring more readily.</td>
</tr>
<tr>
<td>Fuel consumption will be adversely affected.</td>
</tr>
</tbody>
</table>

CommandShift™
CommandShift gear selection can be used as an alternative to automatic gear selection and is particularly effective when rapid acceleration or engine braking are required.
Quick start

1. Select Sport mode. The transmission will automatically select the gear most appropriate to the vehicle’s road speed and accelerator position.

2. Moving the selector lever forward (+) or backward (-) and then releasing will manually select a higher or lower gear (when available). The message **TRANSMISSION COMMANDSHIFT SELECTED** will appear in the message centre.

3. The selected gear will be shown on the instrument pack display.

4. To deselect CommandShift, move the selector lever back to **D**.

TRANSFER GEARBOX

**HIGH** range should be used for all normal road driving and also for off-road driving across dry level terrain.

**LOW** range should be used in situations where low speed manoeuvring is necessary, or in extreme off-road conditions.

**Range changing**

With the engine running, and the main gearbox in **N** (Neutral), move the transfer gearbox lever to the required position and then release. The indicators on the switch and instrument pack display will flash during range changing. When range changing is complete a chime will sound and a message will be displayed on the message centre.
HILL DESCENT CONTROL (HDC)

HDC operates in conjunction with the anti-lock braking system to provide greater control in off-road situations particularly when descending severe gradients.

Press the switch (arrowed in illustration) to select HDC. HDC can be selected at speeds below 80 km/h (50 mph) but will not be fully active until the vehicle speed reduces below 50 km/h (30 mph), confirmed by a continuously illuminated HDC indicator in the instrument pack. Press the switch again to deselect HDC.

AIR SUSPENSION

Vehicle height can be manually adjusted via the raise or lower lever 1. Height changes may only be made when the engine is running and the driver and passenger doors are closed.

Indicators 2 or 7 will illuminate to show the direction of movement. They extinguish when the height change movement is completed.

Off-road height 3, provides improved ground clearance and approach, departure and break-over angles.

On-road height 4, is the normal height for the vehicle.

Access height 5, lowers the vehicle to provide easier entry, exit and loading of the vehicle. This position may be selected up to 40 seconds after the starter switch is turned off.

Crawl (locked at Access height) 6, allows the vehicle to be driven at low speeds at access height, to give increased roof clearance.
Quick start

TERRAIN RESPONSE SYSTEM

When the vehicle is started Terrain Response will normally start in the General (Special programs off) program.

To raise the rotary knob, press down lightly and release. Manual selection of a special program, by rotating the knob, will provide benefits in how the vehicle can be driven over different surfaces or terrains by automatically adjusting the vehicle’s drive and suspension systems.

A special program should be engaged whenever driving conditions could become difficult, and cancelled once those conditions are no longer present. To lower the rotary knob, press down until a click is heard.

General (Special programs off)

Suitable for surfaces that match typical road surfaces.

Grass-Gravel-Snow

Suitable for surfaces which are firm but have a slippery surface, e.g. grass, snow, loose gravel, pebbles or icy conditions.

Mud-Ruts

Suitable for soft, muddy, uneven or deeply rutted ground. It is recommended that low range is selected on the transfer gearbox.

Sand

Suitable for soft, predominantly dry, yielding sandy ground, e.g. sand dunes and deserts. If the sand is damp or wet, the Mud-Ruts program may be more beneficial.

Rock crawl

Only selectable when the transfer gearbox is in low range. Suitable for crossing wet or dry, solid unyielding ground requiring high levels of wheel displacement, e.g. clusters of boulders or rocky river beds.

Wading

The vehicle can wade through water to a depth of 490 mm (19 inches). When doing so, select the program suitable for the surface beneath the water.

Operating note

Vehicle height will be automatically adjusted according to road speed in order to maintain driveability and handling. If Terrain Response is fitted, some of its programs will automatically adjust the suspension height.

Wading
CRUISE CONTROL
Cruise control enables the driver to maintain a constant road speed without using the accelerator pedal.

1. SET (+): to set a road speed or increase the speed in 2 km/h (1 mph) steps when cruise control is operating.
2. SET (-): to set a road speed or decrease the speed in 2 km/h (1 mph) steps when cruise control is operating.
3. RESUME: resumes a SET speed retained in memory.
4. CANCEL: cancel cruise control but retains the set speed in memory.

Operating note
Cruise control will automatically disengage when the brake pedal is used or when the vehicle speed falls below 30 km/h (18 mph).

PARKING AID
With the starter switch in position II, the front and rear parking aids are activated whenever reverse gear is selected. A short confirmation tone will sound after one second.

If an obstruction is detected by the sensors, an intermittent tone will sound (higher pitch for objects detected by the front sensors). As the vehicle moves closer to the obstruction the intermittent tone increases in frequency.

When the distance between the sensor and the obstruction is less than 30 cm (1 foot), the tone becomes continuous.

The parking aid is automatically switched off when the vehicle’s forward speed exceeds 16 km/h (10 mph).

Front parking aid - manual operation

When driving into a limited space, the front parking aid can be manually activated by pressing the switch on the facia. The switch will illuminate and a short confirmation tone will sound.
Quick start

AUDIO SYSTEMS

General operation

Press the control 1 to switch on or off and rotate to adjust volume.

Press the appropriate mode button to select FM, AM, CD or AUX.

- Press one of the buttons to skip CD tracks or to search for a radio station.
- Press one of the buttons to search through a CD track or to manually tune to a radio station.

Steering wheel controls

1. Press to switch between Radio, CD or AUX.
2. Press to increase volume.
3. Press to decrease volume.

4. Press and release to scroll through preset radio stations or CD tracks. Press and hold for two seconds to search up or down for the next or previous radio station or CD track.

Radio operation

Press either the FM or AM button to select the required waveband. Repeated presses of either button will scroll through the FM and AM waveband memory options.

Storing radio stations

To automatically store radio stations, press and hold either the FM or AM button. Autostore will be shown on the information display and the stations will be stored under the preset numbers in the selected waveband.

To recall a preset station, press and release one of the numbered preset buttons. See STATION PRESET BUTTONS (page 281).
Quick start

CD operation

The audio unit features an integral 6-disc autochanger. Insert a disc, label side up, into the player. The disc will load and start to play. To end CD playback, briefly press one of the other mode buttons (FM, AM or AUX). To eject the disc, press the eject button. The display will show the message Remove Disc when it is safe to do so.

<table>
<thead>
<tr>
<th>Compatible disc types</th>
</tr>
</thead>
<tbody>
<tr>
<td>The use of discs with paper labels or double-sided dual format discs (CD or DVD) should be avoided as they could become jammed.</td>
</tr>
</tbody>
</table>

Loading CDs

To insert a single disc, press the CD button, then one of the number buttons 1-6. When prompted by the information display, insert the disc, label side up. The autochanger will load the CD in the selected position.

To fully load the autochanger, press and hold the CD button. The information display will show Loading All. When prompted, insert a disc, label side up. This process is repeated until all six CD positions are occupied.

Playing CDs

When in CD mode, press the appropriate CD number 1-6 to start playing the selected disc. Playback commences and progresses sequentially through all of the loaded discs.

Playback can be paused by briefly pressing one of the other mode buttons (FM, AM or AUX). Playback will resume when the CD button is pressed again.

Ejecting CDs

To eject a single disc, select the required disc by pressing one of the number buttons 1-6 and then press the eject button. To eject all loaded discs, press and hold the eject button, the discs will be ejected one at a time. Remove disc(s) only when the display shows the message Remove Disc.
Quick start

**BLUETOOTH® TELEPHONE**
Mobile phones with Bluetooth capability can communicate with the vehicle’s inbuilt telephone system.

The following procedure demonstrates how to how to connect several of the most popular brands of mobile phone.

**Pairing a phone to the vehicle’s system**
Ensure the phone being paired to the vehicle system is fully charged and that the operating instructions are readily available.

<table>

**Operating note**
If more than one paired Bluetooth phone is in range, the system will automatically select the one last used in Bluetooth mode.
Priority can be given to other phones, by deselecting Bluetooth mode on your phone.

**Mobile phone compatibility**
Not all phones are fully compatible with the Land Rover system. For the latest list of compatible phones and software versions, please refer to [www.landrover.com](http://www.landrover.com). Alternatively consult your Dealer/Authorised Repairer.
Quick start

Making a call

1. Press the telephone mode button on the audio system, or operate the answer call switch 1 on the steering wheel controls.
2. Enter the required telephone number using the keypad.
3. Press the telephone mode button, or operate the answer call switch 1 on the steering wheel to send.

Receiving a call

1. To answer an incoming call, press the telephone mode button on the audio unit or operate the answer call switch 1 on the steering wheel.
2. To end, or reject an incoming call, operate the end call switch 2 on the steering wheel.
