Quick start

REMOTE CONTROL

1. Key release button.
2. Lock button: Press once to lock all doors and activate the perimetric alarm. Press twice within three seconds to deactivate the interior space protection and tilt sensor.
3. Unlock button: Press once to deactivate the alarm and unlock the driver’s door (Single point entry). Press again to unlock the remaining doors.
4. Land Rover button: This is customer configurable, and can be programmed to remotely operate one of the following functions. See PROGRAMMING THE REMOTE CONTROL (page 42).
   - Headlamp on (default).
   - Panic alarm.
   - Air suspension.

Single point entry
This is a security feature that unlocks only the driver’s door. It can be disabled on individual remote controls by simultaneously pressing and holding the lock and unlock buttons for three seconds. The vehicle will lock and then unlock in the currently selected mode to confirm the change. You can now unlock all doors with a single press. Repeating the procedure will re-enable Single point entry.

Automatic relock
If the vehicle is unlocked with the remote control, it will automatically relock and arm the alarm if a door or the tailgate is not opened within one minute.

Key blade
Press button (arrowed in illustration) to release the key blade.

Remote control battery
The remote control battery should never need replacement. The battery is recharged whenever the key is in the starter switch and the engine is running.
Quick start

CENTRAL LOCKING

Master lock and unlock switches

1. Press to unlock all the doors and the tailgate.
2. Press to lock all the doors and the tailgate.

Speed-related locking

If enabled, the doors and tailgate will automatically lock when the vehicle’s speed exceeds 8 km/h (5 mph). This feature can be disabled or enabled in the Settings option accessed via the trip computer.

TAILGATE

Opening the upper tailgate

With all the doors unlocked, press the release switch 1 on the underside of the exterior handle and pull to open.

Opening the lower tailgate

With the upper tailgate open, press the touch pad 2 on the lower tailgate waist moulding.

Note: If the tailgate is locked or unlocked 10 times within a short period, the latch will be disabled for approximately one minute, to protect the battery and lock mechanism.
Quick start

BONNET

Opening
Pull the bonnet release lever 1.
Lift the bonnet safety catch lever 2, and raise the bonnet.

Closing
Lower the bonnet until the safety catch engages. Using both hands, press the bonnet down until the catches click.
Check that both catches 3 are engaged by trying to lift the front edge of the bonnet.

POWER OPERATED SEAT ADJUSTMENT

1. Backrest adjustment.
2. Seat forward or backward, cushion height and front tilt.
3. Lumbar support.
Adjust the seats when:
• the starter switch is at I or II;
• during a 15 minute period after the starter switch is turned to position 0;
• during a 15 minute period after driver’s door is opened or closed.
On vehicles equipped with a memory driver’s seat, the seat active period is 10 minutes.
DRIVING POSITION MEMORY

The vehicle can store individual seat and exterior mirror settings. On those vehicles with an electrically adjustable steering column, the position of the steering column will also be stored.

1. Press the memory button 1 the memory function will be activated for five seconds.
2. Press one of the preset buttons 2 to store the current seat and mirror position.

An audible chime will confirm the setting has been stored, and the message centre will display the number of the button the setting is stored on.

Note: A seat position will only be memorised during the five second active period. Any existing settings will be over-written when programming a memory position.

Lazy entry

This feature enables the vehicle to store the seating and mirror positions for each remote control.

When the vehicle is unlocked using a remote control, the position of the seat and mirrors will adjust to the last used position. This feature can be disabled or enabled in the Settings option accessed via the trip computer.

MANUAL SEAT ADJUSTMENT

1. Forward or backward adjustment.
2. Height adjustment.
4. Lumbar support.
Quick start

WINDOWS AND DOOR MIRRORS

- To open a window, press and hold the respective switch.
- To close a window, pull and hold the switch.
- Window movement can be stopped at any time by releasing the switch.

Both front windows have a one touch facility that allows them to be fully opened or closed with a single operation of the switch. Firmly press the switch and release. Movement can be stopped by briefly pressing the switch again.

Press the right-hand side of the switch 2 to inhibit the operation of the rear window switches.

DOOR MIRROR ADJUSTMENT

To adjust the mirrors, rotate the mirror adjustment knob 1 left or right to select the mirror. Move the knob in any direction to adjust the position of the mirror glass.

POWER FOLD MIRRORS

With the mirror adjustment switch knob in the central position, push the knob downwards to fold or unfold the mirrors.

Reverse automatic mirror dip

When reverse gear is selected the door mirrors will dip. The dip position of the door mirrors can be personalised. See ELECTRIC EXTERIOR MIRRORS (page 110).

This feature can be disabled or enabled in the Settings option accessed via the trip computer. See TRIP COMPUTER (page 115).

Resonance with lowered windows

If a resonance or booming sound occurs when a rear window is open, lowering an adjacent front window about 25 mm (1 inch) will eliminate the condition.
Quick start

STEERING COLUMN ADJUSTMENT

Manual adjustment

1. Move the lever located under the steering wheel fully downward.
2. Adjust the height and reach of the steering wheel to the desired position.
3. Move the lever fully up to lock the position of the wheel.

Electric adjustment

Turn the control on the left-hand side of the column clockwise and then move to adjust the height and reach.

Driver seat movement with starter switch off

If the control is set to AUTO, the position of the steering column and driver’s seat will automatically adjust to provide greater clearance for exit and entry when the starter key is removed.

The position of the steering column and seat will be returned to their previous position next time the key is inserted into the starter switch.

Automatic seat movement

To prevent automatic movement of the driver’s seat when the starter switch is turned on or off, turn the control to its clockwise position.
Quick start

OVERHEAD CONSOLE

Courtesey lamps
Press the centre lamp switch for more than three seconds to enable or disable automatic mode.
The message centre will confirm the mode that is currently set.

If automatic mode is enabled, the front and rear courtesy lamps will operate in conjunction with the vehicle being unlocked or locked or when a door is opened.
The courtesy lamps can be manually switched on or off by pressing and releasing the centre lamp switch (arrowed in illustration).

Sunroof

To open the sunroof:
1. Press and release the rear of the switch 1 to open the roof to the tilt position.
2. Press and release the rear of the switch again to open the roof fully.

To close the sunroof:
1. Press and release the front of the switch 2 to close the roof to the tilt position.
2. Press and hold the front of the switch again to close the roof fully.

If the sunroof is moving, it can be stopped by pressing the switch again.

Operating note
The sunroof can be operated with the starter key in position I or II and for 40 seconds after position 0 has been selected, providing that neither front door has been opened. With the starter key in position I or 0, the switch will need to be pressed and held until the roof reaches the desired position.
SEAT BELTS AND CHILD RESTRAINTS

A warning light on the instrument pack will illuminate to alert you that the driver’s or front passenger’s seat belt is unbuckled. Dependent upon specification this may be accompanied by an intermittent chime.

CHILD SEATS

It is important to remember that the child’s weight, rather than age, determines the type of seat that is required. See CHILD SEATS (page 75).

<table>
<thead>
<tr>
<th>Recommended child seat</th>
</tr>
</thead>
<tbody>
<tr>
<td>Land Rover strongly recommends the use of ISOFIX child seats. ISOFIX child seats can only be fitted in the second-row outer seating positions.</td>
</tr>
</tbody>
</table>

PASSenger AIRBAG Deactivation

If it becomes necessary to fit a child restraint on the front passenger seat, the passenger airbag must be deactivated.

To deactivate the airbag, open the front passenger door and use the starter key to turn the PASS.AIRBAG switch (located on the end of the facia) to the OFF position.

With the airbag deactivated, the status indicator (arrowed in illustration) will illuminate whenever the starter key is turned to position II.

<table>
<thead>
<tr>
<th>Operating note</th>

</tbody>
</table>
HEATING AND VENTILATION
These are the primary functions of the heating and ventilation system. Dependent upon specification, the control panel may differ from those shown.

Control panel - automatic system

Air conditioning
Air conditioning is an integral part of the heating and ventilation system, providing cooled and dehumidified air for occupant comfort. The dry airflow is effective in preventing misting of windows and is also beneficial at low external temperatures.

Air conditioning is automatically switched on and controlled whenever the system is not operating in economy mode.
Quick start

External water deposits
The air conditioning system removes moisture from the air and deposits excess water beneath the vehicle. Puddles may form, but this is normal and no cause for concern.

AUTO mode (Automatic system only)
Press AUTO to select automatic operation of the system, both LEDs in the switch will illuminate.

The system will adjust the heat output, blower speed, air intake and airflow distribution to maintain the selected temperature(s) and reduce misting without further adjustments.

The air distribution and blower controls can be operated to override the automatic settings. This will extinguish the appropriate LED in the AUTO control.

Recommended mode
Select AUTO as the normal operating mode. This will help prevent window misting and eliminate odours from the climate control system.

Temperature selection (Automatic system only)
Rotate the controls 1 to adjust the temperature for the respective side of the passenger compartment.

Air distribution control (Automatic system only)
Press to select the desired distribution setting. An LED will illuminate in the switch.

Windscreen and side window vents
Face level vents
Foot level vents
More than one setting can be selected to achieve the desired distribution.

OFF (Automatic system only)
Press to switch the system off. An LED will illuminate in the switch to show this condition.

Press again to return the system to its previous operating mode. The system will also be reactivated by using the AUTO, blower speed, air distribution or defrost controls.

Defrost mode (Automatic system only)
Press to remove frost or heavy misting from the windscreen. The system will automatically adjust the blower output for maximum clearing, in addition the rear window and windscreen heaters will be activated. Press again to switch off defrost mode. The rear screen and windscreen heaters will remain on.

Press again to switch off defrost mode. The rear screen and windscreen heaters will remain on.

Air recirculation
Press once to activate air recirculation. An LED will illuminate in the switch. Press again to return to fresh air intake.

Blower speed (Automatic system only)
Rotate the blower control 2 to adjust airflow through the vents. As the control is adjusted, LEDs will illuminate to indicate which of the eight possible speeds is currently selected.

Operating note
On the automatic system, it is not possible to achieve a temperature differential of more than 4°C (7°F) between the left and right.

E83440
E83498
E80979
E80986
Quick start

Economy mode
Press to put the system into economy mode. An LED will illuminate in the switch to show this condition.
In economy mode air conditioning is switched off. This reduces the load on the engine, thereby improving fuel consumption.

Temperature selection (Manual system only)
Rotate the control 3 to adjust the air temperature entering the passenger compartment.

Blower speed (Manual system only)
Rotate the blower control 4 to adjust airflow through the vents. As the control is adjusted, LEDs will illuminate to indicate which of the eight possible speeds is currently selected.

Air distribution control (Manual system only)
Rotate the control 5 to achieve the desired air distribution setting.

Windscreen and side window vents
Face level vents
Foot level vents

Rear environment
Press once to activate automatic mode. The upper LED will be illuminated, and the comfort level for the rear passengers will be controlled from the front.
Press a second time to pass control of the rear environment to the rear passengers control panel. The lower LED will be illuminated.

Press a third time to switch this feature off. Neither LED will be illuminated.

HEATED WINDSCREEN AND REAR WINDOW
Press to operate. An LED in the switch will illuminate whilst operating.
The heaters will automatically switch off after a preset interval.

SEAT HEATERS
Press the relevant button to operate the required seat heater at high level. Both LEDs will illuminate.
Press a second time to heat the seat at a lower level. One LED will extinguish.
Press a third time to switch off.
Quick start
Quick start

1. Direction indicators, headlamps, trip computer switch

6. Trip recorder reset switch
7. Gear selector position display
8. Main message centre
9. Warning indicators panel
WARNING INDICATORS
(ATTENTION)
If any of the following illuminates whilst driving a fault has been detected. Refer to the individual pages given below for further information.

- Battery charge indicator. See GENERAL DRIVING POINTS (page 160).
- Low oil pressure. See GENERAL DRIVING POINTS (page 160).
- Electric Parking brake. See ELECTRIC PARKING BRAKE (EPB) (page 153).
- Brake systems. See PRINCIPLE OF OPERATION (page 150).
- Anti-lock braking system. See HINTS ON DRIVING WITH ABS (page 152).
- Airbag system. See AIRBAG WARNING LAMP (page 73).
- Engine management system. See REDUCED ENGINE PERFORMANCE (page 162).
- Engine. See REDUCED ENGINE PERFORMANCE (page 162).
- Suspension system. See PRINCIPLE OF OPERATION (page 176).
- Transmisson. See AUTOMATIC TRANSMISSION (page 142).
- Transmission temperature. See AUTOMATIC TRANSMISSION (page 142).
- Low engine coolant level. See ENGINE COOLANT CHECK (page 213).
- Dynamic Stability Control (DSC). See USING STABILITY CONTROL (page 165).
- Adaptive front lighting system. See ADAPTIVE FRONT LIGHTING SYSTEM (AFS) (page 89).
- Tyre Pressure Monitoring system. See TYRE PRESSURE MONITORING SYSTEM (page 247).
Quick start

WARNING INDICATORS
(INFORMATION)
The following will illuminate during normal driving to indicate that a particular system or feature is operating.

- Seat belt reminder. See SEAT BELT REMINDER (page 65).
- Door open. See LOCKING AND UNLOCKING (page 45).
- Low screen washer level. See WASHER FLUID CHECK (page 217).
- Diesel glow plugs active. See STARTING THE ENGINE (page 140).
- Low gear range selected. See TRANSFER GEARBOX (page 146).
- Hill Descent Control (HDC) active. See USING HDC (page 167).
- Cruise control active. See USING CRUISE CONTROL (page 163).
- Direction indicator. See DIRECTION INDICATORS (page 91).
- Trailer direction indicator. See TOWING A TRAILER (page 193).
- Headlamp high beam on. See LIGHTING CONTROL (page 86).
- Side lamps on. See LIGHTING CONTROL (page 86).
- Rear fog lamps on. See REAR FOG LAMPS (page 87).
- Front fog lamps on. See FRONT FOG LAMPS (page 87).
- Overspeed warning. See GENERAL DRIVING POINTS (page 160).

Diesel particulate filter warnings
If either of the messages DPF FULL SEE HANDBOOK or DPF FULL VISIT DEALER are displayed, you must resolve the problem as soon as possible. See DIESEL PARTICULATE FILTER (DPF).

WINDSCREEN WIPER AND WASHER

Windscreen wiper
1. Intermittent wipe or rain sensor
2. Normal speed operation
3. High speed operation
4. Single wipe - press and release to operate

   Rotate collar S to adjust the speed of the intermittent wipe or sensitivity of the rain sensor (if fitted).
   - Short delay or Most sensitive to rain.
   - Long delay or Least sensitive to rain.

Windscreen washer

   Push the button on the end of the lever to operate the windscreen washer.
Quick start

Rear wiper and washer
Pull the lever to position A for intermittent operation of the rear wiper. Pull and hold the lever in position B to operate the rear washer and wiper.

DIRECTION INDICATORS AND HEADLAMP HIGH BEAM

Move the lever up or down to activate the direction indicators. Moving the lever up or down against spring pressure and then releasing will flash the indicators three times. Useful for lane changing.

Push the lever away from you to select headlamp high beam. A warning indicator will illuminate on the instrument panel.

Trip computer
Press the button on the end of the lever to cycle through the trip computer functions displayed on the message centre.

EXTERIOR LAMPS MASTER SWITCH

1. Exterior lamps off
2. Sidelamps
3. Headlamps
4. Autolamps

If front fog lamps are not fitted, the rear fog lamps will come on at position A.

In AUTO mode and the starter switch in position II, a sensor monitors the exterior light levels and will automatically switch the side lamps and dipped headlamps on and off as required.

Note: Fog lamps cannot be operated if the lamps master switch is in AUTO.
Quick start

ELECTRIC PARKING BRAKE (EPB)

Applying
With the vehicle stationary, pull up the parking brake lever and then release it. The red warning indicator in the instrument pack will illuminate.

On manual transmission vehicles, the parking brake will automatically apply when the starter key is removed.

Releasing
The starter switch must be in position I or II. Apply the foot brake and press down on the parking brake lever.

On automatic transmission vehicles, if the vehicle is stationary with the parking brake applied and either D (Drive) or R (Reverse) selected, pressing the accelerator will automatically release the parking brake.

AUTOMATIC TRANSMISSION

Gearshift interlock
The starter switch must be in position II, the foot brake applied and the selector release button pressed before the gear selector can be moved from P (Park) to R (Reverse).

The gear selector must be in the P position before the starter key can be removed.

Sport mode

Operating note
If Terrain Response is fitted, Sports mode is only available when the General program is selected.

In Sport mode, automatic gear changing is maintained but the gearshift changes are modified to improve performance.

To select Sport mode, move the gear selector from D towards the left hand side of the vehicle.

SPORT will appear on the instrument pack display and the LED in the gear selector surround will illuminate.

Operating note

When Sport is selected, the transmission will stay in lower gears for longer with downshifts occurring more readily.

Fuel consumption will be adversely affected. If Terrain Response is fitted, Sport mode is only available when the General program is selected.
COMMANDSHIFT™
CommandShift gear selection can be used as an alternative to automatic gear selection and is particularly effective when rapid acceleration or engine braking are required.

1. Select Sport mode. The transmission will automatically select the gear most appropriate to the vehicle’s road speed and accelerator position.

2. Moving the selector lever forward (+) or backward (-) and then releasing will manually select a higher or lower gear (when available). The message TRANSMISSION COMMANDSHIFT SELECTED will appear in the message centre.

3. The selected gear will be shown on the instrument pack display.

4. To deselect CommandShift, move the selector lever back to D.

TRANSFER GEARBOX

HIGH range should be used for all normal road driving and also for off-road driving across dry level terrain.

LOW range should be used in situations where low speed manoeuvring is necessary, or in extreme off-road conditions.

Range changing
With the engine running, and the main gearbox in N (Neutral), move the transfer gearbox lever to the required position and then release. The indicators on the switch and instrument pack display will flash during range changing. When range changing is complete a chime will sound and a message will be displayed on the message centre.
HILL DESCENT CONTROL (HDC)

HDC operates in conjunction with the anti-lock braking system to provide greater control in off-road situations particularly when descending severe gradients.

Press the switch (arrowed in illustration) to select HDC. HDC can be selected at speeds below 80 km/h (50 mph) but will not be fully active until the vehicle speed reduces below 50 km/h (30 mph), confirmed by a continuously illuminated HDC indicator in the instrument pack. Press the switch again to deselect HDC.

AIR SUSPENSION

Vehicle height can be manually adjusted via the raise or lower lever 1. Height changes may only be made when the engine is running and the driver and passenger doors are closed.

Indicators 2 or 7 will illuminate to show the direction of movement. They extinguish when the height change movement is completed.

Off-road height 3, provides improved ground clearance and approach, departure and break-over angles.

On-road height 4, is the normal height for the vehicle.

Access height 5, lowers the vehicle to provide easier entry, exit and loading of the vehicle. This position may be selected up to 40 seconds after the starter switch is turned off.

Crawl (locked at Access height) 6, allows the vehicle to be driven at low speeds at access height, to give increased roof clearance.

Operating note

Vehicle height will be automatically adjusted according to road speed in order to maintain driveability and handling. If Terrain Response is fitted, some of it’s programs will automatically adjust the suspension height.
Quick start

TERRAIN RESPONSE SYSTEM

When the vehicle is started Terrain Response will normally start in the General program (special programs off).

Manual selection of a special program will provide benefits in how the vehicle can be driven over different surfaces or terrains by automatically adjusting the vehicle’s drive and suspension systems.

A special program should be engaged whenever driving conditions could become difficult, and cancelled once those conditions are no longer present.

Terrain Response general (special programs off)

Sand

Suitable for soft, predominantly dry, yielding sandy ground, e.g. sand dunes and deserts. If the sand is damp or wet, the Mud-Ruts program may be more beneficial.

Rock Crawl

Only selectable when the transfer gearbox is in low range. Suitable for crossing wet or dry, solid unyielding ground requiring high levels of wheel displacement, e.g. clusters of boulders or rocky river beds.

Wading

Operating note

The vehicle can wade through water to a depth of 600 mm (24 inches). When doing so, select the program suitable for the surface beneath the water.

Grass-Gravel-Snow

Suitable for surfaces which are firm but have a slippery surface, e.g. grass, snow, loose gravel, pebbles or icy conditions.

Mud-Ruts

Suitable for soft, muddy, uneven or deeply rutted ground. It is recommended that low range is selected on the transfer gearbox.
CRUISE CONTROL
Cruise control enables the driver to maintain a constant road speed without using the accelerator pedal.

1. SET (+): to set a road speed or increase the speed in 2 km/h (1 mph) steps when cruise control is operating.
2. SET (-): to set a road speed or decrease the speed in 2 km/h (1 mph) steps when cruise control is operating.
3. RESUME: resumes a SET speed retained in memory.
4. CANCEL: cancel cruise control but retains the set speed in memory.

Operating note
Cruise control will automatically disengage when the brake or clutch pedal is used or when the vehicle speed falls below 30 km/h (18 mph).

AUDIO SYSTEMS
General operation

Press the control 1 to switch on or off and rotate to adjust volume.
Press the appropriate mode button to select FM, AM, CD or AUX.

1. Press one of the buttons to skip CD tracks or to search for a radio station.
2. Press one of the buttons to search through a CD track or to manually tune to a radio station.

Steering wheel controls

1. Press to switch between Radio, CD or AUX.
2. Press to increase volume.
3. Press to decrease volume.
Quick start

4. Press and release to scroll through preset radio stations or CD tracks. Press and hold for two seconds to search up or down for the next or previous radio station or CD track.

Sound settings

Press the button to repeatedly to scroll through the sound settings options. These options vary depending on the specification of the audio system, but will include:

- Bass.
- Treble.
- Balance.
- Fader.
- Reset Tone Settings.

Dependent upon the audio system specification, other options may be available.

With the desired sound setting displayed, rotate the volume control to adjust. Confirm the new setting by pressing the button.

Radio operation

Press either the FM or AM button to select the required waveband. Repeated presses of either button will scroll through the FM and AM waveband memory options.

Storing radio stations

To automatically store radio stations, press and hold either the FM or AM button. Autostore will be shown on the information display and the stations will be stored under the preset numbers in the selected waveband.

To recall a preset station, press and release one of the numbered preset buttons. See STATION PRESET BUTTONS (page 294).
Quick start

CD OPERATION

Compatible disc types

| The use of discs with paper labels or dual format discs (CD or DVD) should be avoided as they could become jammed. |

Standard audio

The standard audio unit features a single-slot CD player. Insert a disc, label side up, into the player. The disc will load and start to play. To end CD playback, briefly press one of the other mode buttons (FM, AM or AUX). To eject the disc, press the eject button. The display will show the message Remove Disc when it is safe to do so.

Premium audio

The premium audio unit features an integral 6-disc autochanger.

Loading CDs

To insert a single disc, press the CD button, then one of the number buttons 1-6. When prompted by the information display, insert the disc, label side up. The autochanger will load the CD in the selected position.

To fully load the autochanger, press and hold the CD button. The information display will show Loading All. When prompted, insert a disc, label side up. This process is repeated until all six CD positions are occupied.

Playing CDs

When in CD mode, press the appropriate CD number 1-6 to start playing the selected disc. Playback commences and progresses sequentially through all of the loaded discs.

Playback can be paused by briefly pressing one of the other mode buttons (FM, AM or AUX). Playback will resume when the CD button is pressed again.

Ejecting CDs

To eject a single disc, select the required disc by pressing one of the number buttons 1-6 and then press the eject button. To eject all loaded discs, press and hold the eject button, the discs will be ejected one at a time. Remove disc(s) only when the display shows the message Remove Disc.
Quick start

**TELEPHONE - BLUETOOTH SYSTEM**

Mobile phones with Bluetooth capability can communicate with the vehicle’s inbuilt telephone system.

The following procedure demonstrates how to how to connect several of the most popular brands of mobile phone.

**Pairing a phone to the vehicle’s system**

Ensure the phone being paired to the vehicle system is fully charged and that the operating instructions are readily available.

See the phone manufacturer’s instructions for further details or follow the table below on how to connect some of the most popular brands of mobile phone and their generic commands:

<table>
<thead>
<tr>
<th>Nokia</th>
<th>Motorola</th>
<th>Ericsson</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Select menu</td>
<td>Select menu</td>
<td>Select menu</td>

</tr>
<tr>
<td>8 No connection? Select Bluetooth (Menu) then Paired devices Land Rover</td>
<td>Permission to bond? Select Yes and enter pass code 2121</td>
<td>Enter pass code 2121 after prompt</td>
</tr>
</tbody>
</table>

When the phone has been successfully paired to the system, **Bluetooth** will appear on the Phone menu screen.

**Operating note**

If more than one paired Bluetooth phone is in range, the system will automatically select the one last used in Bluetooth mode.

Priority can be given to other phones, by deselecting Bluetooth mode on your phone.

**Mobile phone compatibility**

Not all phones are fully compatible with the Land Rover system. For the latest list of compatible phones and software versions, please refer to [www.landrover.com](http://www.landrover.com). Alternatively consult your Dealer/Authorised Repairer.
Quick start

Making a call

1. Press the telephone mode button on the audio system, or operate the answer call switch 1 on the steering wheel controls.
2. Enter the required telephone number using the keypad.
3. Press the telephone mode button, or operate the answer call switch 1 on the steering wheel to send.

Receiving a call

1. To answer an incoming call, press the telephone mode button on the audio unit or operate the answer call switch 1 on the steering wheel.
2. To end, or reject an incoming call, operate the end call switch 2 on the steering wheel.
