Reversing

If reverse gear is selected while the front wipers are operating, the rear wiper will operate automatically.

Tailgate open disable

If the tailgate is opened while the rear wiper is operating, the wiper will:

- Stop immediately.
- Not start to move if it is already stationary.

If the tailgate is then closed, the wiper will start after three seconds.

If the tailgate is open and the vehicle's speed is above 3 km/h (2 mph), then the wiper will operate normally.

HEADLAMP POWER WASH

If the headlamps are on, and there is sufficient liquid in the washer reservoir, operating the screen washer will also power-wash the headlamps.

The headlamp power wash will operate on every fifth operation of the screen washer, provided the headlamps are still switched on and 10 minutes (5 minutes in some markets) have elapsed since the last headlamp wash.

Switching the headlamps or ignition off and back on again will reset the cycle.

Note: *If the fluid level sensor in the screen washer reservoir detects a low level, the headlamp power wash is inhibited.*

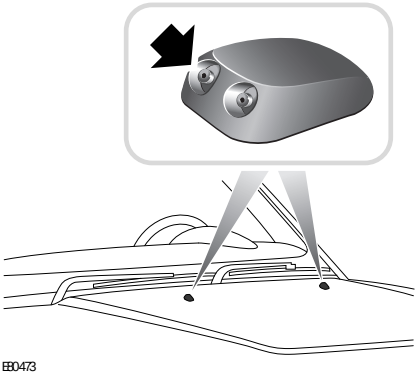

ADJUSTING THE WINDSCREEN WASHER JETS

WARNING

Do not operate the washer jets during adjustment. Washer fluid may cause irritation to the eyes and skin.

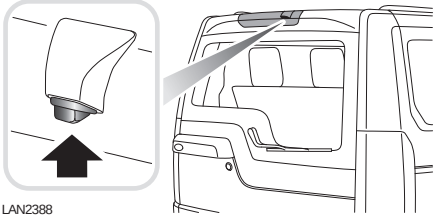

Always read and observe the washer fluid manufacturer's instructions.

Front

EB0473

Rear

LAN2388

If jet adjustment is necessary, insert a needle into the opening and gently lever it to the correct position. The jet spray should hit the centre of the windscreen.

If a jet becomes obstructed, insert a needle into the opening to clear the blockage.
