COMPACT DISC COMPATIBILITY

CAUTIONS

Irregular shaped CDs and CDs with a scratch protection film should not be used.

CDs with labels (or stickers) attached, should not be used. Labels may become warped and prevent the CD from being ejected, causing damage to the CD player. Such damage is not covered by the warranty agreement.

The CD unit will play compact discs that conform to the international Red Book standard audio specification. Copy-protected CDs from some manufacturers do not conform to this standard and playback cannot be guaranteed.

Due to technical incompatibility, recordable (CD-R) discs and re-writable (CD-RW) discs may not function correctly.

Dual format, dual-sided discs (DVD Plus, CD-DVD format) are thicker than normal CDs and consequently playback cannot be guaranteed in Land Rover audio units, and jamming could occur. Warranty claims, where this type of disc is found to be inside an audio unit returned for repair, will not be accepted.

The following CD formats may cause the CD player to malfunction. It is recommended that the following types of CD are not used:

- 8 cm (3.1 in.) discs with or without an adaptor.
- CDs that are not circular.
- CDs with a paper label.
- CDs that are warped, dirty, scratched or have an abnormal edge.
- Dual format, dual-sided discs (DVD Plus, CD-DVD format).
- DVDs.

It is recommended that only high quality 12 cm (4.7 in.) circular discs, that show the Compact Disc Digital Audio logo, are used.
