Seat belt pre-tensioners

WARNINGS

The seat belt pre-tensioners will only be activated once and then must be replaced by a Land Rover Dealer/Authorised Repairer. Failure to replace the pre-tensioners will reduce the efficiency of the vehicle's front restraint systems.

After any impact, always have the seat belts and pre-tensioners checked and, if necessary, replaced by a Land Rover Dealer/ Authorised Repairer.

In the interests of safety, it is recommended that removal or replacement of the front seats and seat belts should only be carried out by a Land Rover Dealer/Authorised Repairer.

The seat belt pre-tensioners activate in conjunction with the airbag SRS and provide additional protection in the event of a severe frontal impact. The pre-tensioners automatically retract the seat belts fitted to the front seats. This reduces any slack in both the lap and diagonal portions of the belts, thereby reducing forward movement of the belt wearer.

The airbag SRS warning indicator on the instrument pack, will alert you to any malfunction of the seat belt pre-tensioners.

If the pre-tensioners have been activated, the seat belts will still function as restraints and must be worn in the event that the vehicle remains in a driveable condition.

Note: *The seat belt pre-tensioners will be activated in major side and frontal impacts and in rollovers.*

SEAT BELT REMINDER

Beltminder commences when the vehicle is in motion and the driver's belt is unbuckled. Dependent on market, the warning indicator in the instrument pack illuminates, the message **FASTEN SEAT BELTS** appears in the message centre and an audible chime sounds.

The visual and audible warnings applicable to the Beltminder feature are market dependent to meet individual market requirements. The warning signals given may also change depending on whether the vehicle is stationary or when the vehicle speed exceeds a pre-determined threshold.

In certain markets, the Beltminder feature also applies to the front passenger seat.

Note: *Objects placed on the front passenger seat may activate the seat belt reminder warning chime and indicator. It is recommended that any objects placed on the front passenger seat are secured using the seat belt.*
