## **SURROUND CAMERA SYSTEM**

The camera home page is accessed from the **Home menu** screen. If **Cameras** has not been set as a short cut, touch **Extra features** to display the list.

With the engine running, the surround camera system uses 5 discretely placed cameras to assist in manoeuvring the vehicle.

#### 1. Enlarge:

To enlarge a camera view, touch the image then touch the **Enlarge** soft key. Any 2 images can be selected and enlarged to view side-by-side on the screen.

When viewing two images, one of them can be selected to view as a full screen image. It can then be zoomed into and panned around using the magnifier and arrow icons.

## 2. Proximity View:

Selecting **Proximity View** will display a combination of three images from the front and passenger side cameras.

## Automatic Proximity View - Japan only.

When Drive or Reverse is selected, the forward or rear view will be displayed. Once the vehicle speed exceeds 18 km/h (11 mph) or the return icon is pressed, the camera screen will disappear.

**Note:** Proximity view can be accessed at any time, by touching **Proximity View** on the **Camera** home page.

## 3. Special Views:

A selection of pre-set views can be displayed by selecting **Special Views**. They are provided to assist with difficult manneuvres and are:

- **Kerb view:** Shows views from the 2 front cameras.
- Junction view: Shows views from the two side cameras.

#### 4. Camera Setting - Japan only:

Touch the **Camera Setting** soft key to access the camera options page. To deactivate the Semi-auto camera functionality select **Off**. The Proximity view is now only accessible by manual activation using the **Proximity View** soft key.

#### Hitch assist

Hitch assist is a user selectable touch screen feature that can aid the process of guiding the vehicle to the trailer tow hitch. Use Hitch assist while reversing the vehicle to the trailer hitch.

## Proceed as follows:

- 1. Engage reverse gear and touch the screen.
- 2. Select Hitch assist. A single hitch line is projected onto the rear view image.
- 3. Reverse the vehicle towards the trailer.
- 4. As the vehicle closes to within 0.6 m (23.5in) of the trailer tow hitch, an automated zoom feature is operated to enlarge the view.
- 5. Continue the manoeuvre carefully until the vehicle and trailer are as close as required.
