TRIP COMPUTER

A short press (two seconds or less) or a series of short presses of the **i** button will change the trip computer display.

The options available are:-

- Approximate maximum range on the remaining fuel.
- Instantaneous fuel consumption.
- Average fuel consumption.
- Average speed.
- Review active warning messages.
- Blank message screen displaying only the external temperature.
- Trip distance.

To reset the trip values to zero, press and hold the **i** button for two seconds.

To reset the fuel consumption figures to zero, press and hold the **i** button until the display clears.

WARNING AND INFORMATION MESSAGES

⊙ If a warning message appears take appropriate action immediately. Failure to do so may result in serious damage to the vehicle.

The messages are displayed for twenty seconds when required and also when the ignition is switched on.

If the **i** symbol is displayed there are current warning messages waiting to be reviewed. To do so, press the **i** button repeatedly until the list of messages is displayed. The display will then cycle through the list of messages until the **i** button is pressed again.
