

DUAL VIEW

Dual view allows the front passenger to view TV or other video media on the touch screen, while the driver uses an alternative system (e.g. radio or navigation).

Note: *If the driver has selected an alternative audio source (e.g. radio), this will be heard over the vehicle speakers. The passenger will need to listen to the dual view source using the wireless headphones.*

Press this button (located below the touch screen) to activate dual view mode. Once dual view is active, the passenger should press this button to show/hide the dual view controls menu.

Note: *The controls menu will also be displayed on the driver's view.*

Note: *Rear seat passengers may be able to see both views when dual view is active.*

HEADPHONES

The headphones provided with dual view are identical to those provided with rear seat entertainment. See **131, HEADPHONES**.
