ALTERNATIVE FREQUENCY (AF)

Some radio stations broadcast on different frequencies in different parts of the country. If the selected station signal weakens, the radio will automatically re-tune to a stronger Alternative Frequency (AF), if one is available. This feature is particularly useful on long journeys, where the vehicle travels through different transmitter areas serving the same radio station.

To enable/disable AF:

1. Press the **MENU (2)** button.
2. Select **Audio Settings**.
3. Select **ALTERNAT.FREQ**. Turn AF on or off.
4. Press **OK**.

SELECTING TRAFFIC INFORMATION

Normal reception can be interrupted to broadcast traffic information from stations on the FM waveband using the Radio Data System (RDS) and Enhanced Other Network (EON) links.

When a radio station capable of providing traffic information is selected, the **TP** indicator appears on the top line of the display.

Briefly press the **INFO** (**6**) button to select the Traffic Announcement (TA) function. The **TA** indicator appears on the top line of the display.

As soon as a traffic announcement is received, current audio entertainment is interrupted and **Traffic** appears in the display, along with the name of the station providing the information.

If a non-traffic station is selected or recalled using a preset button, the audio unit will remain on that station unless **TA** is turned off, then on again.

To cancel a Traffic announcement, briefly press the **INFO** button, or alternatively the **MODE** button on the steering wheel, during the announcement. This will not turn off **TA**.

To deselect the TA function, briefly press the **INFO** button again. The **TA** indicator will disappear from the display.

TRAFFIC ANNOUNCEMENT VOLUME

Traffic announcements interrupt normal broadcasts at a preset minimum level that is usually louder than normal listening volumes. To adjust the volume of traffic announcements, use the volume control during an incoming TA broadcast. The display will show the level selected.

All subsequent traffic announcements will be at the set volume.

SELECTING NEWS INFORMATION

Normal reception can be interrupted to broadcast news bulletins from stations on the FM waveband using the Radio Data System (RDS) and Enhanced Other Network (EON) links, in the same way that traffic information is provided.

To set the NEWS feature:

1. Press the **MENU** (**2**) button.
2. Select **Audio Settings**.
3. Select **News**.
4. Press **OK** to enable or disable the News feature.

To cancel a News announcement, briefly press the **INFO** button, or alternatively the **MODE** button on the steering wheel, during the announcement. Select **INFO** again to turn off the News feature.

Note: *Both traffic and news information can be selected at the same time. However, the radio will always give priority to traffic information.*
