HITCH ASSIST

Hitch assist is a user selectable touch screen feature that can aid the process of guiding the vehicle to the trailer tow hitch. Use Hitch assist while reversing the vehicle to the trailer hitch.

Proceed as follows:

1. Engage reverse gear. The rear camera provides a wide-angle rear view colour image on the touch screen.
2. Touch the screen briefly to display the view options or select **Extra features** from the home menu, select **Cameras** and then **Settings**.
3. Select **Hitch assist**. A single hitch line is projected onto the rear view image.
4. Reverse the vehicle towards the trailer.
5. As the vehicle closes to within 0.6 m (2 ft) of the trailer tow hitch, an automated zoom feature is operated to enlarge the view.
6. Continue the manoeuvre carefully until the vehicle and trailer are as close as required.
