

This symbol, affixed to the end of the fascia on the passenger side, warns against the use of a rear-facing child seat in the front passenger seat, when a front passenger airbag is fitted and operational.

CHILD SEAT POSITIONING

Crash statistics show that children are safest when properly restrained in a child or infant restraint system that is secured in a rear seating position.

Information given within the table is correct at the time of going to press. However, availability of child restraints may change. Please consult your Dealer/Authorised Repairer for the latest recommendation.

Note: *The information contained in the following table may not be applicable to all countries. If you are in any doubt regarding the type and fitment of child seats seek advice from your Dealer/Authorised Repairer.*

Note: *Ages given are approximate. In case of doubt, the child's weight not age should be used when considering an appropriate child seat.*

Note: *The legislation which governs how and where children should be carried when travelling in a vehicle, is subject to change. It is the responsibility of the driver to comply with all regulations in force.*
