- With the seat belt unfastened, unreel the seat belt to the limit of its travel. Check that it unreels smoothly with no snatches or snags. Allow the belt to fully retract, again checking for smooth operation.
- Partially unreel the seat belt, then hold the tongue plate and give a quick forward pull. The mechanism must lock and prevent any further unreeling.

If any of the seat belts fail to meet those criteria, immediately contact your Land Rover Dealer/Authorised Repairer.

SEAT BELT WARNING LAMP

If a front seat belt is not fastened when the vehicle is in motion, a chime will sound and the seat belt warning lamp will illuminate.

Note: *If a heavy object is placed on the front passenger seat, it may activate the seat belt reminder. It is recommended that any objects are secured using the seat belt.*

Always ensure that objects carried within the vehicle are secured properly.

BELTMINDER

A front and rear seat Beltminder system warns the driver when the seat belt of an occupied seat is not fastened or is unfastened during a journey.

SL1860

A graphic displayed in the message centre indicates which seat belts are fastened at the start of a journey and also when a seat belt is fastened or unfastened during a journey.

Each seating position is represented by a passenger icon, the colour of which indicates the seat belt status:

- Green - seat belt in the indicated position is fastened.
- Red - seat belt in the indicated position has been unfastened while the vehicle ignition is on. This indicator will turn grey after 30 seconds.
- Grey - seat belt not fastened.

Note: *The indicators will be displayed for 30 seconds each time there is a status change, e.g., a seat belt is unfastened or fastened or a door is opened and then closed.*

In addition, an audible warning will sound under the following conditions:

- The seat belt of an occupied front seat is not fastened or is unfastened during a journey.
- A rear seat belt is unfastened.

Note: *If a heavy object is placed on the front passenger seat, it may activate the Beltminder feature. It is recommended that any objects placed on the front passenger seat are secured using the seat belt.*
