TOWING WEIGHTS

Maximum permissible towing weights	On-road	Off-road
Unbraked trailers	750 kg (1653 lbs)	500 kg (1102 lbs)
Trailers with overrun brakes	3500 kg (7716 lbs)	1000 kg (2205 lbs)
Trailer with fully coupled brakes	4000 kg (8818 lbs)	1500 kg (3307 lbs)
Tongue/nose weight	150 kg (330 lbs)	150 kg (330 lbs)

⚠ **Do not exceed the Gross Vehicle Weight (GVW), maximum rear axle weight, maximum trailer weight, or nose weight. Exceeding any of these limits could cause instability and loss of control.**

Note: *When towing in certain European countries, the maximum permissible gross vehicle weight can be increased by a maximum of 100 kg (220 lbs) provided that the road speed is limited to 100 km/h (62 mph). Check with the national regulations.*

Note: *When calculating rear axle loading, remember that the trailer nose weight, the load in the vehicle's luggage area, weight on the roof rack and the weight of rear seat passengers all contribute to the load on the rear axle.*

Australia only

The weight of a trailer must not exceed 1.5 times the towing vehicle's weight. The tongue/nose weight must be a minimum of 7% of gross caravan/trailer weight, up to a maximum of 250 kg (722 lbs).
