BEFORE STARTING OR DRIVING

If the vehicle is involved in a collision it should be checked by a Land Rover Dealer/Authorised repairer, or suitably qualified persons before starting or driving.

Following a collision the vehicle must be inspected thoroughly.

Check for:

- Fuel and fluid leaks
- Battery damage
- Wiring loom damage
- Damage to lamps
- Damage to steering, suspension, wheels and tyres
- Bodywork damage resulting in sharp or protruding edges
- Condition of door locks
- Condition and operation of seat belts
- Condition of child restraints and their fixing mechanisms.

Note: *Collision damage may not be obvious. Deformity of parts may have occurred which could affect the safe operation of the vehicle. Safety system components should be inspected by your Dealer/Authorised Repairer as soon as possible.*
