## Vehicle batterv

- 3. Connect/switch on the starting aid.
- 4. Start the engine and allow it to idle
- 5. Disconnect/switch off the starting aid.
- 6. Disconnect the negative (Black) cable from the negative terminal of the vehicle.
- 7. Disconnect the positive (Red) cable from the positive terminal of the vehicle.

## **REMOVING THE VEHICLE BATTERY**

- Switch the ignition off before  $\wedge$ disconnecting battery terminals. Always disconnect the negative terminal first and reconnect last.
- Remove all metal iewellerv before  $\wedge$ working on, or near, the battery, and never allow metal objects or vehicle components to come into contact with the battery terminals. Metal objects can cause sparks, and/or short circuits, resulting in an explosion.
- Do not allow the battery posts or  $\mathbb{A}$ terminals to come into contact with your skin. They contain lead, and lead compounds which are toxic. Always wash your hands thoroughly after handling the battery.

Always disconnect the negative terminal first and reconnect last.

Use caution when lifting the battery  $\mathbb{A}$ out of, or into, the vehicle. It is heavy, and may cause injury when lifting, or if dropped.

Do not tip the battery when lifting or moving as tilting the battery more than 45 degrees may damage the battery, and may cause the electrolyte to leak out. Battery electrolyte is highly corrosive, and toxic.

The vent pipe must be in place at all  $\mathbf{M}$ times when the battery is connected to the vehicle. Ensure that the vent nine is clear of obstructions and not kinked. Failure to do so may cause a pressure build up in the battery. resulting in an explosion.

 $\odot$ 

Do not rest the battery on any part of the vehicle as it may cause damage due to its weight.

Do not run the engine with the battery disconnected. Doing so may damage the charging system.

Note: Ensure that all electrical circuits are switched off all windows are closed and the alarm is disarmed

Note: Remove the smart key from the vehicle and wait two minutes to allow the systems to power down fully
