

## 4. Panoramic roof switch:

Wherever possible remove any snow, ice, dirt, and leaves etc. from the panoramic roof mechanism before closing. Failure to do so may damage the panoramic roof mechanism.

- Press lightly at the rear of the switch to tilt the roof. Once tilted, lightly press again to open the roof.
- From the fully open position, press lightly at the front of the switch to close to the tilt position, then press lightly again to close fully.
- One touch open and close, press firmly at the front or rear of the switch and release.

**Note:** The panoramic roof will operate for 30 seconds after the ignition is turned off, provided that a front door is not opened.

If it is still necessary to raise the window or close the sunroof, the override procedure is as follows:

1. Attempt to close the window/sunroof, anti-trap will prevent closure and lower the window/open the sunroof slightly.
2. Within ten seconds attempt to raise the window/close the sunroof again, anti-trap will prevent closure and lower the window/open the sunroof slightly.
3. Attempt to close the window/sunroof for a third time, this time hold the switch in the close position. Hold until closed.

**Note:** If this procedure fails to remove the blockage, the window operation may need to be reset. See **200, WINDOW RESET**.

**Note:** The sunroof anti-trap mechanism works differently and does not require reset if activated. See **200, SUNROOF RESET**.

## WINDOW ANTI-TRAP PROTECTION

The anti-trap mechanism does not operate when closing the sunroof from the tilted position. The sunroof can cause serious injury should a body part become trapped. Always ensure that the sunroof is free from obstructions before closing.

Before closing a window or the sunroof, ensure that no occupants have any part of their body in a position where it could be trapped. Even with an anti-trap system death or serious injury could occur.

Anti-trap protection will stop window or sunroof movement if an obstruction or resistance is detected. Check the window or sunroof and its aperture and remove any obstructions (e.g. ice, etc.).
