Maintenance

WIPER BLADE REPLACEMENT

Fit only replacement wiper blades that are identical to the original specification.

Before changing a wiper blade, the wiper arms must be set in the 'service' position as follows:

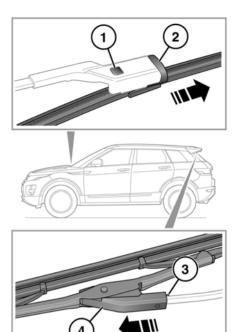

Note: The Smart Key must remain in the vehicle while wiper blades are replaced.

- **1.** Ensure that the ignition is turned off.
- 2. Turn the ignition on then off again.
- 3. Immediately push the wiper control down to start the single wipe operation and turn on the ignition again.
 - The wipers will move to their service position.
- **4.** When the new parts have been fitted, turn the ignition off. This will return the wipers to park position.

Front wiper blade: Lift the blade clear of the windshield.

- 1. Push down on the button and hold.
- 2. Pull the wiper blade away from the button.

When the new blade is pushed into the receiver, the button will click into place.

SL1904

Rear wiper blade: Lift the blade clear of the screen.

- 3. Pull the tab out and hold.
- 4. Slide the blade down the wiper arm to clear the mounting.

When the new blade is pushed into the wiper arm, the tab will click into place.
