

Wipers and washers

When stationary, if the tailgate is opened while the rear wiper is operating, it will stop. When the tailgate is closed, the wiper will start to operate again after a delay of three seconds.

If the tailgate is open and vehicle speed is above 2 mph (3 km/h) the wiper will operate normally.

WIPER BLADE REPLACEMENT

This subject is covered in the Maintenance section. See **174, WIPER BLADE REPLACEMENT**.
