

Portable media

Acceptable video media recordable discs include; DVD-R, DVD+R, DVD+RW, CD-R, CD+R and CD+RW.

It is recommended that only high quality 12 cm (4.7 in.) circular discs are used.

USB VIDEO

The vehicle system will play video files stored on USB 2.0 devices recorded in MPEG4 DivX 3, 4, 5, 5.2, 6.0 or MPEG4 XVID only.

MP3 FILE PLAYBACK

If an MP3 CD is to be used, each session must be properly closed after recording but the whole disc does not have to be finalized.

When Browse is selected, the list of folders and MP3 files is displayed. Select a folder to view and select the tracks.

- The highest compression rate supported, is 320 kbits per second (kbps). If anything less than 128 kbps is used, Digital Signal Processing (DSP) functionality may be lost.
- The CD player may take a longer time to load an MP3 disc, if there are more tracks than on a normal CD. To minimize loading time, a rigid folder structure is recommended.
- If a CD contains a mixture of MP3 and CDDA tracks, any MP3 tracks will be ignored.

PORTABLE MEDIA CONNECTIONS

Portable media devices can be connected to the media hub located in the cubby box. The portable devices that you can connect to the system include:

- USB mass storage devices (e.g. a memory stick). Devices must use FAT or FAT32 file format.

- iPod (iPod Classic, iPod touch, iPhone™ and Nano are supported - full functionality for older devices cannot be guaranteed). iPod Shuffle functionality cannot be guaranteed.
- Auxiliary device (personal audio, MP3 players, all iPods).

Note: Auxiliary devices have no touch screen control.

If you are connecting an iPod or mass storage device, use the touch screen to operate and search the device. Many of the controls are similar to those available for CD play.

NOTICE

Please disconnect your iPod when leaving the vehicle. Failure to do so may result in the iPod battery discharging.

Note: The audio system will play MP3, WMA and AAC files.

To maximize playback quality, it is recommended that lossless compression is used for any media files on USB or iPod. Failing this, it is recommended that compressed files utilize a minimum bitrate of 192 kbps (a higher bitrate is strongly recommended).

Note: iPod and iPhone are registered trademarks of Apple Inc., registered in the U.S. and other countries.

Note: Some MP3 players may have their own file system that is not supported by this system. To use your MP3 player, you must set it to USB Removable Device or Mass Storage Device mode. Only music that has been added to the device in this mode can be played.

PLAYING A PORTABLE DEVICE

If you are using a USB mass storage device or approved iPod, you can control playback using the touch screen controls.
