

## BLUETOOTH® INFORMATION

Bluetooth® is the name for short-range radio frequency (RF) technology that allows electronic devices to communicate wirelessly with each other.

The Land Rover Bluetooth® system supports Bluetooth® Hands-Free Profile (HFP), Advanced Audio Distribution Profile (A2DP) and Audio Video Remote Control Profile (AVRCP).

**Note:** *HFP and A2DP/AVRCP profiles can be connected independently, so a phone can be connected via one, while a media device can be connected via the other, at the same time.*

Before making use of the vehicle's Bluetooth phone system, your Bluetooth® phone must be paired and connected to the vehicle system. This is done using one of two methods; via your phone to the vehicle or from the touch screen to your phone. If one of these methods is not successful, try the other option.

Each time the ignition is switched on the system will attempt to connect with the last connected phone.

As cell phones have a wide range of audio and echo characteristics, it may take a few seconds for the vehicle system to adapt and deliver optimum audio performance. To achieve this, it may be necessary to reduce the in-vehicle volume and ventilation fan speed slightly.

## TELEPHONE COMPATIBILITY

Please refer to the Owners section of the Land Rover website at [www.landrover.com](http://www.landrover.com), for a list of compatible phones. In the Owners section, select Bluetooth®.

**Note:** *The Bluetooth® equipped phones listed on Landrover.com, have been tested for compatibility with Land Rover vehicles. Performance will vary, based on the phone's software version, battery condition, coverage and your network provider. Phones are warranted by their manufacturer, not Land Rover.*

If the cell phone supports Bluetooth® Hands Free Profile 1.5 (HFP 1.5), additional features will be displayed on the vehicle touch screen, such as battery meter, signal strength and network operator.

## TELEPHONE SAFETY

### **⚠ WARNING**

**Even when using the Bluetooth® hands-free feature, use of your telephone while you are driving is dangerous, as it diverts attention from the traffic situation. If you wish to use your telephone, stop at an appropriate place where you are not endangering or inconveniencing other vehicles.**

### **⚠ WARNING**

**Drivers should talk on their cell phones only when it is safe to do so and when such use will not distract the driver from the road.**

### **⚠ WARNING**

**Drivers should never text message while driving. Texting while driving diverts attention from the road and can lead to accidents, causing injury or death.**
