

Vehicle battery

BATTERY WARNING SYMBOLS

Do not allow any naked flames, or other sources of ignition near the battery as the battery may emit explosive gasses.

Ensure that when working near, or handling the battery, suitable eye protection is worn. This will reduce the risk of eye damage caused by acid splashes.

To prevent risk of injury, do not allow children near the battery.

Be aware that the battery may emit explosive gasses.

The battery contains acid which is extremely corrosive, and toxic.

CALIFORNIA PROPOSITION 65 WARNING

Second Warning Statement:

WARNING

Battery posts, terminals and related accessories contain lead and lead compounds. Wash hands after handling.

BATTERY CARE

DANGER

If swallowed, battery fluid can be fatal. Seek medical assistance immediately.

WARNING

Do not allow battery fluid to contact your skin or eyes. It is both toxic and corrosive which can result in severe injuries. If battery fluid comes into contact with your eyes, skin or clothes, you should remove the affected clothing and flush the skin/eyes with plenty of water. Seek medical assistance immediately.

WARNING

Do not connect any 12 volt equipment directly to the battery terminals. Doing so may cause a spark, which can result in an explosion.

WARNING

The cell plugs and vent pipe must be in place at all times when the battery is connected to the vehicle. Ensure that the vent pipe is clear of obstructions and not kinked. Failure to do so may cause a pressure build up in the battery, resulting in an explosion.

WARNING

Do not expose the battery to a naked flame or spark as the battery produces explosive, flammable gas.

WARNING

Never jump start, boost charge, or try to start a vehicle with a frozen battery. Doing so can result in an explosion.
