

AIR BAG DEPLOYMENT EFFECTS

⚠ WARNING

When an air bag inflates, a fine powder is released. This is normal and not an indication of a malfunction. The powder may cause irritation to the skin and should be thoroughly flushed from eyes and any cuts or abrasions. This powder can cause breathing difficulties for asthma sufferers or other people with respiratory problems. If this occurs, get out of the vehicle as soon as it is safe to do so or get fresh air by opening a window. If breathing problems persist, seek medical attention.

⚠ WARNING

Air bag deployment is accompanied by a very loud noise which may cause discomfort and temporary loss of hearing.

After inflation, the front and seat mounted side air bags deflate immediately. This provides a gradual cushioning effect for the occupants and also ensures that the driver's forward vision is not obscured.

AIR BAG WARNING LAMP

The air bag warning lamp is mounted in the instrument pack, and will illuminate as a bulb check when the ignition is turned on.

⚠ WARNING

Even with advanced air bags, children can be seriously injured or killed. Never place a child in any type of child restraint or booster seat in the front passenger seat. Children under the age of 13 should always travel in the rear.

If any of the following warning lamp conditions occur, the vehicle should be checked by your Land Rover Retailer/Authorized Repairer immediately.

- The warning lamp fails to illuminate when the ignition is turned on.
- The warning lamp fails to extinguish within 6 seconds of the ignition being turned on.
- The warning lamp illuminates at any time other than the bulb check, as previously described.

AIR BAG SERVICE INFORMATION

⚠ WARNING

Do not attempt to service, repair, replace, modify, or tamper with, any part of the SRS. This includes wiring or components in the vicinity of SRS components. Doing so may cause the system to trigger, or render the system inoperative, either of which may result in serious injury or death.

⚠ WARNING

Do not use any electrical test equipment or devices in the vicinity of SRS components or wiring. Doing so may cause the system to trigger or render the system inoperative, either of which may result in serious injury or death.

⚠ WARNING

For your safety, all of the following operations should only be carried out by a Land Rover Retailer/ Authorized Repairer, or suitably qualified person:-

- Removal or repair of any wiring or component in the vicinity of any SRS components.
- Installation of electrical, or electronic, equipment and accessories.
- Modification to the front or sides of the vehicle exterior.
