

Vehicle recovery

TOWING EYES

⚠WARNING

The towing eye at the front is designed for on-road recovery only. If it is used for any other purpose, it may result in vehicle damage and cause serious injury or death.

⚠CAUTION

Do not tow the vehicle on all four wheels.

ATTACHING THE FRONT TOWING EYE

The front towing eye is included in the tool kit, located in the under-floor area of the luggage compartment.

E144619

1. Pop out the cover in the front bumper.
2. Locate the towing eye through the bumper and screw the towing eye counter-clockwise into its fixing, until secure.

TRANSPORTING THE VEHICLE

⚠WARNING

Use extreme caution when moving or towing the vehicle. Death or serious injury may occur.

NOTICE

Only use the lashing points, or over-tire tie-downs or wheel chocks. Lashing over the body or suspension is not permissible, as settling of the air suspension will cause lashing straps to slacken.

The recommended method for recovery/transportation of the vehicle, is on a transporter or trailer designed for that purpose.

Make sure that transportation is carried out by suitably qualified persons, and that the vehicle is secured correctly.
