

4. Press to decrease the volume, when in a call.
5. Press to answer an incoming call. Press and release to access the Last 10 dialed list or, to dial a number/contact. Press and hold to access the phonebook list view.
6. Press to end a call or to reject an incoming call.

Note: When scrolling through a phonebook or the Last 10 list, each contact is also displayed in the Message center.

Note: In order to scroll through any Last 10 list, the 'phone' button (5) must first be pressed.

CALL VOLUME

The phone call volume is operated by the Audio system's volume control.

If the Audio system is in use when a phone call is active, the Audio system source is suppressed for the duration of the call. Navigation instructions and Parking aid warnings are not suppressed.

PHONEBOOK

Contacts stored in the memory of a paired phone can be automatically downloaded to the vehicle's phonebook each time the phone is connected to the system. See **146, TELEPHONE COMPATIBILITY**.

Certain phones store the phonebook in 2 different areas, the SIM card and the phone's memory. The vehicle's system will access only those numbers stored in the phone's memory.

To access contacts from the phonebook:

1. From the **Phone** menu, select **Phonebook**.
2. Using the keyboard, select the letter you wish to search under.
3. Select **List** to view the phonebook.

4. Identify the required contact from the displayed list and touch to call. If a contact has more than 1 number stored, select the required number from the list.

Note: It may be necessary to use the scroll bar to see the entire list.

There are also options to view more contact information, by selecting the corresponding **i** key.

If your phone supports contact type data, you will be able to see a contact type icon in the vehicle's phonebook directory. These can be seen to the right of each contact in the directory and will indicate 1 of the following types:

Default.

Cell phone.

Home.

Work.

DECLARATION OF CONFORMITY

Export controls

This product contains commodities, technology, or software exported from the United States in accordance with the Export Administration regulations. Diversion contrary to U.S. or Canadian law is prohibited.

United States of America

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

Note: *The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.*

Canada

IC - RSS-210

Operation is subject to the following two conditions:

- (1) this device may not cause interference, and
- (2) this device must accept any interference, including interference that may cause undesired operation of the device.

This equipment complies with FCC/IC radiation exposure limits set forth for uncontrolled equipment and meets the FCC Radio Frequency (RF) Exposure Guidelines in Supplement C to OET65 and RSS-102 of the IC Radio Frequency (RF) Exposure rules. This equipment has very low levels of RF energy that is deemed to comply without Maximum Permissible Exposure (MPE) evaluation.

But it is desirable that it should be installed and operated with at least 20cm (8 inches) and more between the radiator and person's body (excluding extremities: hands, wrists, feet, and ankles).

USA FCC ID: A269ZUA130

Canada IC: 700BIAM2101

Note: *Changes or modifications, not expressly approved by the party responsible for compliance, could void the user's authority to operate the equipment.*

Note: *This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.*

This equipment generates, uses and can radiate Radio Frequency (RF) energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- *Reorient or relocate the receiving antenna.*
- *Increase the separation between the equipment and the receiver.*
- *Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.*
- *Consult the dealer or an experienced radio/TV technician for help.*
