

NOTICE

*Do not start the engine if the fluid level has dropped below the **MIN** mark. Severe damage to the steering pump could result.*

NOTICE

Seek qualified assistance immediately if there is a noticeable drop in the fluid level. Severe damage to the steering pump could result.

NOTICE

If fluid loss is slow, the reservoir may be topped up to the upper level mark to enable the vehicle to be driven to a repair facility for examination. However, it is recommended that you seek qualified assistance before driving.

Check and top up the fluid with the vehicle on level ground, the engine switched off, and the system cold. Make sure that the steering wheel is not turned after stopping the engine.

The level of fluid can be seen through the translucent body of the reservoir.

The fluid level should be between the **MIN** and the **MAX** marks.

TOPPING UP THE POWER STEERING FLUID

NOTICE

Power steering fluid will damage painted surfaces. Soak up any spillage with an absorbent cloth immediately and wash the area with a mixture of car shampoo and water.

NOTICE

*Do not fill the reservoir above the **MAX** mark.*

1. Clean the filler cap before removing, to prevent dirt from entering the reservoir.
2. Remove the filler cap.
3. Using the approved PAS fluid, top up the reservoir until the fluid level is between the **MIN** and **MAX** marks. See **231, LUBRICANTS AND FLUIDS**.
4. Replace the filler cap.

CHECKING THE WASHER FLUID LEVEL

⚠ WARNING

Some windshield washer products are inflammable, particularly if high or undiluted concentrations are exposed to sparking. Do not allow washer fluid to come into contact with open flames or sources of ignition.

⚠ WARNING

If the vehicle is operated in temperatures below 40°F (4°C), use a washer fluid with antifreeze protection. In cold weather, failure to use a washer fluid with frost protection, could result in impaired vision and increase the risk of a vehicle crash.

NOTICE

Do not use an antifreeze or vinegar/water solution in the washer reservoir - antifreeze will damage painted surfaces, while vinegar can damage the windshield washer pump.
