THE EXTERIOR

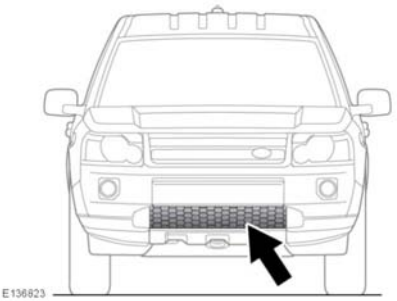

- Remove any heavy deposits of mud and dirt with a hose before washing the vehicle.
- Some high pressure cleaning systems are sufficiently powerful enough to penetrate suspension joints, door/window seals and damage trim and door locks. Never aim the water jet directly at the engine air intake, heater air intakes, body seals (doors, sunroof, windows etc.), or at any components which may be damaged (lights, mirrors, exterior trim, suspension seals and gaiters, etc.). Make sure that the pressure washer nozzle is always at a distance of more than 12 inches (300 mm) from any component of the vehicle.
- Do not use a power wash system in the engine bay area.
- Following cleaning of the vehicle's exterior (particularly with a pressure washer), it is recommended that the vehicle is taken for a short drive to dry out the brakes.
- Substances which are corrosive, such as bird droppings, can damage the vehicle's paintwork and should be removed as soon as possible.
- Do not apply polish to any unpainted areas of bumper mouldings. It will become ingrained in the textured finish.

UNDER BODY MAINTENANCE

Regularly flush the under body with plain water, and pay particular attention to areas where mud and debris collect.

If damage or corrosion are detected, have the vehicle checked by a Dealer/Authorised Repairer as soon as possible.

AFTER OFF-ROAD DRIVING

- Make sure the areas around air intakes and the front grille are clean and clear of debris. Pay particular attention to the lower grille and radiator. Failure to do so may cause the engine to overheat, leading to severe engine damage.

Make sure the vehicle's underside is cleaned as soon as possible after driving off-road.

THE INTERIOR

- **Do not polish the Instrument panel. Polished surfaces are reflective, and may interfere with the driver's view.**

Clean plastic or cloth-faced surfaces with warm water and non-detergent soap, and then wipe clean with a soft cloth.

LEATHER UPHOLSTERY

- Only use cleaning products specifically designed for use on leather. Do not use chemical, alcohol, or abrasive materials, as they will cause rapid deterioration of the leather. The use of products which are not approved will invalidate your warranty.
- If you are in any doubt as to which products to use, consult your Dealer/ Authorised Repairer.
