LABEL LOCATIONS

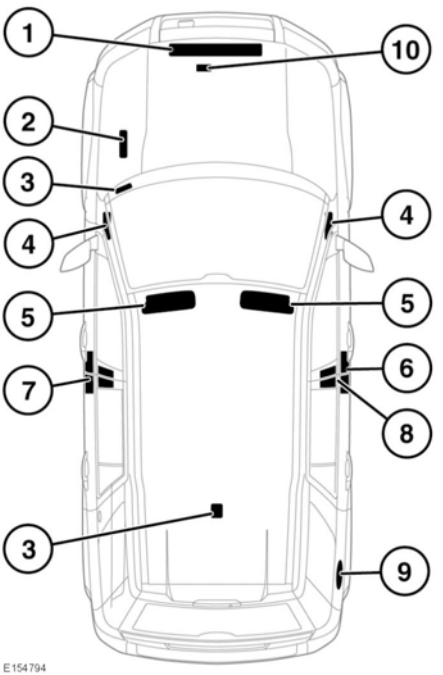

Warning labels attached to your vehicle bearing this symbol mean: Do not touch or adjust components until you have read the relevant instructions in the handbook.

Labels showing this symbol indicate that the ignition system utilises very high voltages. Do not touch any ignition components while the starter switch is turned on.

Additional information labels may also be found at the following locations:

1. Bonnet locking platform - Air conditioning label.
2. Top of the battery - Battery warning symbols.
3. The Vehicle Identification Number (VIN) is stamped on a plate, which is visible through the lowest part of the left side of the windscreen.
   The VIN is also stamped on the body, forward of the spare wheel well.

   Note: *If you need to communicate with a Dealer/Authorised Repairer, you may be asked to quote the VIN number.*
4. End of fascia (passenger side) - Passenger airbag label.
5. Sun visor - Airbag label, vehicle handling label.
6. Base of the right B pillar - Tyre pressure label, airbag warning label.
7. Left B pillar - Airbag warning label, Vehicle Identification Number (VIN) plate.
8. Right B pillar - VIN plate (China).
9. Inside the fuel filler flap - Fuel label.
10. Engine number:
    - Diesel - The number is located on the front of the engine block.
    - Petrol - The number is located on the front of the engine block.

It is important that you are familiar with these subjects, to make sure that your vehicle and its features are used safely. Using the index at the back of this handbook, refer to the relevant topic for more information.

VEHICLE BUILD DATE PLATE

This is the calendar month and year in which the body and power train assemblies were conjoined, and the vehicle was driven from the production line.

The vehicle built date is shown on the tyre pressure label attached to the right B pillar.
