

Battery disposal: Batteries contain harmful substances and must be disposed of correctly. Seek advice on disposal from a Dealer/ Authorised Repairer and/or your local authority.

SMART KEY CARE

To prevent accidental operation, which may result in an injury, never leave the Smart key in the vehicle if children or animals are also left in the vehicle.

Do not expose to extremes of heat, dust, humidity or allow contact with fluids. Do not leave the transmitter exposed to direct sunlight.

The emergency key blade number is recorded on an attached label. Peel off the label and attach it to the designated area in the Service Record & Warranty Benefits, supplied in the literature pack. Keep this safe, but not in the vehicle.

The operational range of the Smart key will vary considerably depending on atmospheric conditions and interference from other transmitting devices.

Note: *The Radio Frequency (RF) used by the Smart key may be used by other devices (e.g. medical equipment). This may prevent the Smart key from operating correctly.*
