If the service you want is not already stored in a preset button or cannot be received, then you can step through the other services in the current ensemble by repeated short presses on the Seek-up or Seek-down buttons. At the end of the ensemble, a further press will show '**Searching….**' for a few seconds and then the next ensemble will be shown. You can then step through each service in this new ensemble by repeated short presses as above.

To store a service on a preset: While playing the desired service, press and hold the desired preset button. A bar-graph will show, indicating how long you need to hold the button, followed by a '**Preset Stored**' pop-up message. Now release the button.

DAB SERVICE LIST

A quick way to see all the services available on the presets and all the other services which may be received in the current ensemble is to use the navigation control (**3**) to go to the waveband list, select either **DAB1** or **DAB2**, then the right navigation button to list the presets of DAB1 or DAB2. If the desired station is not listed, there is a **Service List** option at the top of the list. Scroll up to the **Service List** item and press the right navigation button to see all the services of the current ensemble listed. Use the navigation control up/down buttons to scroll up and down the list. If you want to select a service, scroll the outline box onto the desired service and press **OK**.

DAB MANUAL TUNING

Press and hold the seek-up or seek-down buttons for approximately 3 seconds to enter **Manual Tuning**. The **Manual Tuning** pop-up will appear on the display. Using the seek-up or seek-down buttons you can then move through all the services and ensembles in turn.

If an ensemble is empty or not receivable then the tuning will move along to the next. If an ensemble is only just strong enough to receive but the services are too weak to use, the tuning may stop on that ensemble and display the ensemble's name, and possibly the service's name, but without sound. If no sound is heard within 5 to 10 seconds then press the appropriate seek button again to move onto the next useable ensemble.

To select and play a service of your choice, locate it and make sure the audio is receivable, then press **OK**.

The **Manual Tuning** mode allows up to 30 seconds of inactivity before it times out. If **Manual Tuning** times out with no new service tuned, the radio will revert to the service you were tuned to at the start of your Manual Tuning session.

SERVICELINK

ServiceLink is an item on the Menu (**2**) and can be enabled or disabled using the **OK** button.

When ServiceLink is enabled, 2 additional features come in to operation:

- If you are listening to a local service which has a partner service in an adjacent area, when the signal weakens it will automatically change over to the new area's partner service.
- If you have selected a digital service which has an equivalent FM service in the area and your digital service has deteriorated, then the radio will automatically switch to the alternative FM service until the digital reception becomes adequate again.

We advise that ServiceLink is switched off when searching for ensembles or using Manual Tuning.
