- Make sure that a suitable breakaway cable or secondary coupling is used. Refer to the trailer manufacturer's instructions for guidance.
- Make sure that the tow ball is secure.
- Check the operation of all trailer lights.

## Australia only:

**Nose weight** must be a minimum of 7% of gross caravan/trailer weight, up to a maximum of 150 kg (330 lb).

## TRAILER ELECTRICAL CONNECTION

Attach only approved electrical connectors, which are in good condition, to the trailer socket

The vehicle connector provides a 5 amp output which must not be exceeded. An accessory harness kit increasing output to 15 amp is available from a Dealer/Authorised Repairer.

When a trailer's electrical connection is made and the vehicle's direction indicators are used, the trailer warning indicator will flash in time with the direction indicators. See **46**, **TRAILER DIRECTION INDICATORS (GREEN)**.

# TRAILER STABILITY ASSIST (TSA)

When a trailer is attached, TSA will automatically detect when a trailer sway is developing. It will then gradually reduce vehicle speed by cutting engine power and applying the brakes to help regain control.

### HITCH ASSIST

Hitch assist is a user selectable Touch screen feature that can aid the process of guiding the vehicle to a trailer tow hitch. Use Hitch assist while reversing the vehicle to a trailer hitch.

Proceed as follows:

- Engage reverse gear. The rear camera provides a wide-angle rear view colour image on the Touch screen.
- 2. Touch the Hitch assist icon on the Touch screen to enable the Hitch assist guidance lines to be displayed. See 99, REAR CAMERA
- 3. Reverse the vehicle towards the trailer.
- As the vehicle closes to within 600 mm (2 ft) of the trailer tow hitch, an automated zoom feature is operated to enlarge the view.
- **5.** Continue the manoeuvre carefully until the vehicle and trailer are as close as required.

### FITTING THE DETACHABLE TOW BALL

Fit and remove instructions are supplied with this accessory fit item. Make sure they are kept in a safe place.
