

3. Use Land Rover leather cleaner for heavily soiled areas. Dry off and rub with a clean soft cloth, changing surfaces regularly.

Use Land Rover leather cleaner several times a year to maintain the leather's suppleness and appearance. The cleaner will nourish and moisturise, and help to improve the surface protection film against dust and substances.

- Dark clothing may stain leather seats, just like other upholstery products.
- Sharp objects such as belts, zippers, rivets, etc., can leave permanent scratches and scratch marks on the leather surface.
- Unless spillages such as tea, coffee, or ink are washed away immediately, permanent staining may have to be accepted.

If a valet service is used, make sure the specialist concerned is aware of, and follows, these instructions precisely.

Note: *Some materials/fabrics are prone to dye transfer, which can cause unsightly discolouration of lighter coloured leathers. Affected areas should be cleaned and re-protected as soon as possible.*

SEAT BELTS

Do not allow any water, cleaning products, or fabric from cloths to enter the seat belt mechanism. Any substance which enters the mechanism may affect the performance of the seat belt in an impact.

Extend the seat belts fully, then use warm water and a non-detergent soap to clean. Allow the seat belts to dry naturally while fully extended.

Note: *While cleaning the seat belt, take the opportunity to examine the webbing for damage/wear. Any wear or damage should be reported to, and rectified by, a Dealer/Approved Repairer.*

AIRBAG MODULE COVERS

Airbag covers should only be cleaned using a slightly dampened cloth, and a small amount of upholstery cleaner.

Do not allow the airbag covers, or surrounding areas, to become contaminated with liquids. Any substance which enters the mechanism can prevent correct deployment of an airbag during an impact.

INSTRUMENT PANEL, TOUCH SCREEN AND AUDIO SYSTEM

- Clean with the cloth provided with the vehicle.
- Do not use chemical agents or domestic cleaners.
- To prevent errors occurring, make sure that only one finger at a time is in contact with the screen.
- Do not use excessive pressure.
- Do not allow sharp, hard, or abrasive objects to make contact with the screen.
- Avoid exposing the screen to direct sunlight for long periods.
