FRONT SEAT BASE REFIT

Make sure that the seat base is securely fitted in place before driving.

Refit a seat base as follows:

- 1. Slide the lid back into position and close it.
- 2. Secure the catch at the front of the compartment.
- **3.** If applicable, reconnect the electrical connection.
- **4.** Engage the 2 pins at the rear of the seat base into the receivers.
- **5.** Push down firmly on the front edge of the base to engage the retaining clips.
