- **SEEK** only the strongest stations will be stored during auto-store.
- Off manual seek.
- Long press to auto-store the current frequency. Up to six Radio Frequencies can be stored in presets 1-6.

RADIO DATA SYSTEM (RDS)

RDS is a radio information system available from FM broadcasts. RDS allows reception of information, such as traffic information and station names, and also allows automatic re-tuning to a stronger transmitter that is broadcasting the same programme.

- 1. Press and hold the **AUDIO/SETUP** button to open the setup menu.
- 2. Select TUNER.
- 3. The following options are now available for selection.
 - AF Alternative Frequencies. Select ON or OFF.
 - REGIONAL Regional programming.
 Select ON or OFF.
 - **PI SEEK** Programme information seek. Select **ON** or **OFF**.
- Press and hold AUDIO/SETUP to close the setup menu.
