## Standard audio system

Long press to enter radio manual seek mode or, to scan backwards through a CD track.

In radio manual seek mode, further short presses will change the frequency in single decrements.

- **12. MENU**: Press to select the Audio system menu, with the following options:
  - Audio settings.
  - · Clock settings.
  - Language.
- 13. CD: Press to select CD mode.
- 14. Tone: Press to select the Tone menu.
- 15. TA: Traffic information.
- **16.** Audio system information display.
- **17. MODE**: Press repeatedly to scroll through all audio modes.
- **18.** Steering wheel volume up.
- **19.** Steering wheel volume down.
- 20. Seek down:

Short press to select the previous radio preset or the previous track on the chosen audio source.

Long press to scan backwards through a track.

**21.** Seek up:

Short press to select the next radio preset or the next track on the chosen audio source.

Long press to scan forwards through a track.

## ADAPTIVE VOLUME CONTROL (AVC)

The AVC feature adjusts the volume level, to compensate for the changes in road noise as the vehicle's speed increases or decreases.

**Note:** The AVC setting represents the volume increase and not the volume level.

If the AVC level is set to **zero**, there will be no volume increase. With a low level setting, the volume increase at speed will be minimal. If a high level setting is used, there will be a noticeable increase of volume at greater speed.

To set the AVC level:

- Press the MENU button, then using the menu navigation control (10), press up or down to select AUDIO settings to access the volume settings menu. Select Adaptive Vol.
- Use the left and right buttons on the menu navigation control (10) to adjust the AVC setting.
- 3. Press **OK** to confirm the selection.

## **TONE ADJUSTMENT**

Press the Tone button (14), to display the Tone menu. The settings for bass, treble, balance, and fade can be adjusted using the navigation buttons. Press **OK** to store the settings and return to the previous screen.

**Note:** If no adjustment is made within 10 seconds, the display will revert to the previously displayed screen.

## **AUTO STORING RADIO STATIONS**

AutoStore can be used to store the stations with the strongest signals available, either from the AM or the FM waveband.

Using Autostore:

- 1. Press **RADIO** button (4) to select the desired waveband.
- 2. Find a station. If necessary, use the seek buttons (9 and 11).
- Press and hold the RADIO button until the display confirms that Autostore is in progress.
