

Using a hose pipe, direct clean water through the front bumper (where shown), to remove mud on the radiator and air conditioning condenser.

THE INTERIOR

Some cleaning products contain substances that are harmful and can cause health problems if used incorrectly, and may cause damage to the interior.

FABRIC UPHOLSTERY

Do not polish the instrument panel. Polished surfaces are reflective, and may interfere with the driver's view.

Clean plastic or cloth-faced surfaces with warm water and non-detergent soap. Then wipe clean with a soft cloth.

LEATHER UPHOLSTERY

Only use cleaning products specifically designed for use on leather. Do not use chemical, alcohol, or abrasive materials, as they will cause rapid deterioration of the leather. The use of products which are not approved will invalidate your warranty.

If you are in any doubt as to which products to use, consult your Dealer/Authorised Repairer.

Leather should be cleaned and protected at least every 6 months.

To prevent ingrained dirt and staining, inspect the seat upholstery regularly, and clean every 1 to 2 months as follows:

1. Wipe off fine dust from the seat surfaces using a clean, damp, non-coloured cloth. Avoid over-wetting the leather.
2. If this is not sufficient, use a cloth which has been dampened with warm soapy water and then wrung out. Use only mild non-caustic soap.
3. Use Land Rover leather cleaner for heavily soiled areas. Dry off and rub the area with a clean soft cloth, changing surfaces regularly.

Use Land Rover leather cleaner several times a year to maintain the leather's suppleness and appearance. The cleaner will nourish and moisturise and help to improve the surface protection film against dust and substances.

- Dark clothing may stain leather seats; just like other upholstery products.
- Sharp objects, such as belts, zippers, rivets, etc, can leave permanent scratches and scratch marks on the leather surface.
- Unless spillages, such as tea, coffee, or ink are washed away immediately, permanent staining may have to be accepted.

If a valet service is used, make sure that the specialist concerned is aware of, and follows, these instructions precisely.

Note: *Some materials/fabrics are prone to dye transfer, which can cause unsightly discolouration of lighter coloured leathers. Affected areas should be cleaned and re-protected as soon as possible.*
