

- Adjust the seat cushion to its highest position. If cushion rake adjustment is possible, adjust it to its lowest position.
- Adjust the seatback to the fully upright position.
- Adjust the seat belt adjustable upper anchorage to its lowest position.

Extreme hazard! Do not use a rearward facing child restraint on a seat protected by an airbag in front of it!

NEVER use a rearward facing child restraint on a seat protected by an ACTIVE AIRBAG in front of it, DEATH or SERIOUS INJURY to the CHILD can occur.

The following symbols warn against the use of a rear-facing child seat in the front passenger seat, when a front passenger airbag is fitted and is operational.

E132397

This symbol is fixed to the end of the fascia on the passenger side.

E145193

This symbol is fixed to the passenger side sun-visor.

CHILD SEAT POSITIONING

Information given within the table is correct at the time of going to press. However, availability of child restraints may change. Please consult your Dealer/Authorised Repairer for the latest recommendation.

Note: The information contained in the following table may not be applicable to all countries. If you are in any doubt regarding the type and fitment of child seats, seek advice from your Dealer/Authorised Repairer.

Crash statistics show that children are safest when properly restrained in a child or infant restraint system that is secured in a rear seating position.

Note: Ages given are approximate. In case of doubt, the child's weight, not age, should be used when considering an appropriate child seat.

Note: The legislation which governs how and where children should be carried when travelling in a vehicle is subject to change. It is the responsibility of the driver to comply with all regulations in force.
