CHILD SAFETY LOCKS

If children are to be carried in the rear seat positions, it is recommended that the rear door interior handles are disabled.

Press the switch to activate the child door locks and inhibit the rear windows. The LED indicator will illuminate when active and a message will display in the Message centre.

To switch off, press the switch again. The LED will extinguish and a message will display in the Message centre.

CHILD SEATS

For optimum safety, children should travel in the rear of the vehicle at all times; front passenger seat travel is not recommended. However, if it is essential that a child travels in the front (and national legislation permits this), set the vehicle seat fully rearward and seat the child in an approved forward-facing child seat. Do not use a rear-facing child seat - an inflating airbag could impact with the seat and cause serious injury.

Do not use a forward-facing child seat until the child using it is above the minimum weight of 9 kg (20 lb.) and able to sit up unaided. Up to the age of 2, a child's spine and neck are not sufficiently developed to avoid injury in a frontal impact.

Do not allow a baby or infant to be held or carried on the lap. The force of a crash can increase effective body weight by as much as thirty times, making it impossible to hold onto the child.

Children typically require the use of a booster seat appropriate to their age and size, thereby enabling the seat belts to be properly fitted, reducing the risk of injury in a crash. Children could be endangered in a crash if their child restraints are not properly secured in the vehicle.

Do not use a child seat that hooks over the seatback. This type of seat cannot be satisfactorily secured and is unlikely to be safe for your child.

NEVER use a rearward facing child restraint on a seat protected by an ACTIVE AIRBAG in front of it, DEATH or SERIOUS INJURY to the CHILD can occur.

Extreme Hazard! Do not use a rearward facing child restraint on a seat protected by an airbag in front of it!

The seat belts fitted to your vehicle are designed for adults and larger children. For their safety, it is very important for all infants and children under 12 years of age to be restrained in a suitable child safety seat appropriate to their age and size.

The following symbols warn against the use of a rear-facing child seat in the front passenger seat, when a front passenger airbag is fitted and is operational.
