

Radio

PTY (PROGRAM TYPE)

The RBDS (Radio Broadcast Data System) allows programs to be categorised by the broadcast type (rock music, current affairs, news etc.).

This in turn, allows you to search for a station by choosing the type of broadcast that you wish to listen to.

PTY search

ICE1912 NAS

To search for a station by program type RBDS must be set to ON. Press the **MENU/OK** button to enter the menu. Use the rotary control to scroll through the menu until **PTY Seek** is highlighted, then press the rotary control.

Having entered the **PTY** menu, use the rotary control to scroll through the program types until your choice is highlighted. Press either the rotary control, or the **MENU/OK** button to select the program type and start the search.

Once a matching station is found, it will continue to play. If you wish to continue searching, press the seek up or seek down button within thirty seconds. To continue listening to the station, no action is required as it will remain tuned, and can be stored as a pre-set if required.

If the system is unable to tune to a PTY station **No PTY** will be displayed.

To abort a PTY search press the **C** button.

Radio

WEATHER	Weather information

Note: **TEST** and **ALERT** emergency broadcast stations may not be available currently. When the **ALERT** stations are available, they will broadcast important information in the event of an emergency.

TEST broadcasts a test signal for the emergency information. This allows public and emergency services to ensure that emergency procedures can be practised without causing alarm.
