

THE EXTERIOR

NOTICE

To prevent damage to your vehicle when using a valeting service, make sure to advise them of the cleaning instructions contained within the Owner's handbook.

NOTICE

Following cleaning of the vehicle's exterior (particularly with a pressure washer), it is recommended that the vehicle is taken for a short drive, in order to dry out the brakes.

NOTICE

Some high pressure cleaning systems are sufficiently powerful enough to penetrate the door and window seals, and damage trim and door locks. Never aim the water jet directly at the engine air intake, heater air intakes, body seals (doors, sunroof, windows, etc.), or at any components which may be damaged (lights, mirrors, exterior trim, etc.).

NOTICE

Some high pressure cleaning systems are sufficiently powerful to damage the wheels and brake system. Never aim a water jet directly at the wheels or brakes.

NOTICE

Do not use a power wash system in the engine bay area, as it may cause damage.

NOTICE

Make sure that you read and comply with all warnings and product instructions supplied with any cleaning products.

NOTICE

Never use cleaning products that are not approved for use on vehicles.

NOTICE

Substances which are corrosive, such as bird droppings, can damage the vehicle's paintwork and should be removed as soon as possible.

SENSORS AND CAMERAS

NOTICE

When washing the vehicle, do not aim high pressure water jets directly at any of the sensors and cameras. Do not use abrasive materials or hard/sharp objects to clean the sensors and cameras. Only use approved vehicle shampoo.

Park assist and Parking aid sensors should be kept clean to maintain accuracy and performance.

If required, the cameras should be cleaned using a cloth moistened with a small amount of glass-cleaning product.

UNDER BODY MAINTENANCE

Regularly flush the under body with plain, clean water, and pay particular attention to areas where mud and debris collect.

If damage or corrosion are detected, have the vehicle checked by a Retailer/ Authorized Repairer as soon as possible.

AFTER OFF-ROAD DRIVING

NOTICE

Make sure that the areas around air intakes and the front grille are clean and clear of debris. Pay particular attention to the lower grille and radiator. Failure to do so may cause the engine to overheat, leading to severe engine damage.
