

From inside your vehicle, call SIRIUS using the displayed number. You will need your credit card details and the SIRIUS ID number (also displayed on-screen).

**Note:** With a **Bluetooth®** wireless technology enabled phone paired and connected to the vehicle, you can touch the **green** phone icon to call the SIRIUS subscription line.

### SATELLITE RADIO RECEPTION

Satellite radio can significantly increase the number of radio channels available.

Where satellite signal strength is adversely affected by terrain, ground transmitters are used to relay the signal.

**Note:** If any auxiliary electrical equipment is connected to the vehicle, then this may reduce the radio sound quality.

### SIGNAL ACQUIRING

If the satellite signal is lost, or not found, **Acquiring** will be shown on the display. If the signal is not regained within a few seconds, all of the relevant soft keys will be inhibited. The dotted line after **Acquiring** will flash until the channel is regained. When the signal has been regained, the selected channel will again play.

**Note:** This is not the same as No Subscription. The system is only informing the driver that it cannot find the signal, perhaps caused by driving alongside tall buildings and trees, or driving under bridges and tunnels.
