Note: *If the low battery warning does not extinguish, this indicates that the replacement battery is not in a new and unused condition.*

Refit the parts in reverse order, making sure that they click securely into place.

Battery disposal: Batteries contain harmful substances and must be disposed of correctly. Seek advice on disposal from a Retailer/Authorised Repairer and/or your local authority.

SMART KEY CARE

⚠ **To prevent accidental or unauthorised operation, never leave the Smart key unattended in the vehicle. Never leave children or animals unattended in the vehicle. The vehicle can be operated when the Smart key is inside the vehicle.**

Do not expose to extremes of heat, dust or humidity, or allow contact with fluids. Do not leave the Smart key exposed to direct sunlight.

The emergency key blade number is recorded on an attached label. Peel off the label and keep it safe, but not in the vehicle.

The operational range of the Smart key will vary considerably, depending on atmospheric conditions and interference from other transmitting devices.

Note: *The Radio Frequency (RF) used by the Smart key may be used by other devices (e.g., medical equipment). This may prevent the Smart key from operating correctly.*
