SOLAR ATTENUATING GLASS

This type of windscreen filters sunlight passing through a special laminated layer.

E167876

Electronic actuating cards, such as toll road payment cards or Radio Frequency (RF) ID tags, can be fixed at the dedicated locations on the inside of the windscreen. If these cards are located at any other part of a solar attenuating windscreen, the electronic scanners may not recognise them.

The fixing location is at the top of the windscreen, close to the interior rear-view mirror.

Note: *It is recommended that the electronic actuating card should be in the size appropriate location, on the driver's side of the windscreen.*

Note: *Transponders, mounted on the front number plate plinth, can be used as an alternative, dependent on the market and availability.*
