- If the **Link DAB** setting is switched on and the signal strength for a channel falls below an acceptable level, the audio unit will automatically search other available ensembles for a channel with the same name.
  If an alternative local channel is found, the new channel is played automatically after a few seconds. If the channel is not found after a few seconds, the message **No reception** is displayed.
  The word **Link** is displayed at the top of the Touch screen when **Link DAB** is enabled.
- Select **DAB country** if driving into another country. Scroll through the country options to choose the appropriate one. This will prompt an auto-tune.

  Note: *This option is disabled while the vehicle is moving.*
- Choose **DAB format** if moving to a region that uses a different digital band. Available formats are:
  - L Band
  - Band III
  - L Band & Band III
  - L Band Canada
  - L Band Can & Band III

  Note: *This option is disabled while the vehicle is moving.*
  This will prompt an auto-tune.

ENSEMBLES

Unlike AM/FM radio, DAB transmits several channels/stations on a single frequency. A group of channels is known as an ensemble. Some channels within the ensemble may have subchannels offering several listening options.

If reception is lost when the vehicle is in motion, the vehicle may be out of range of the ensemble. To build a new list of ensembles, select **Auto-tune**.
