

Exterior lights

This feature can be disabled/enabled via the **Driving Features** menu. See **53, INSTRUMENT PANEL MENU**.

The following may affect the operation of Auto high beam:

- Highly reflective road signs.
- Dimly lit road users, for example, cyclists or pedestrians.
- Adverse weather conditions, for example, rain or fog.
- Dirty or obscured sensor.
- Dirty, damaged or misted windscreen.
- Oncoming vehicles partially obscured by a central motorway barrier.
- An icy or frosted windscreen.

Note: Make sure to defrost the windscreen during winter conditions.

Note: The system cannot be relied upon to activate or deactivate high beam in all possible circumstances. It remains the driver's responsibility to use the headlamps correctly at all times.

Note: Make sure that the forward-facing sensors on the back of the rear-view mirror are not blocked or obstructed.

HEADLAMPS - CONDENSATION

Misting of lamp lenses can occur under some atmospheric conditions. This will not affect the performance of the lamps and will clear during normal operation.

HEADLAMPS - DRIVING ABROAD

The headlamps have a beam pattern that eliminates the need to mechanically adjust the lamps or add any external stick-on decals.

To configure the Auto high beam system for the side of the road on which you are driving, proceed as follows:

1. Using the menu control on the steering wheel, select **Driving Features** via the Message centre.
2. Select **Auto High Beam setting**.
3. Select **Drive on Left** or **Drive on Right**, for the side of the road that you are driving on.

ADAPTIVE FRONT LIGHTING SYSTEM (AFS)

When cornering using low beam, AFS will adjust the headlamp beams to provide improved illumination in the direction of travel.

AFS is deactivated when:

- Reverse gear (**R**) is selected.
- The vehicle is stationary.
- Daytime running lamps are on.

If a system fault is detected, the headlamps will attempt to move to the central position, and remain stationary. The AFS warning lamp will illuminate to indicate that a fault is present. See **60, ADAPTIVE FRONT LIGHTING SYSTEM (AMBER)**.
