## CHILD SAFETY LOCKS

If children are to be carried in the rear seat positions, it is recommended that the rear door interior handles are disabled.

Press the switch to activate the child door locks and inhibit the rear windows. The LED indicator illuminates when active and a message displays in the Message centre.

To switch off, press the switch again. The LED extinguishes and a message displays in the Message centre.

## CHILD SEATS

**For optimum safety, children should travel in the rear of the vehicle at all times; front passenger seat travel is not recommended. However, if it is essential that a child travels in the front (not permitted in Australia), set the vehicle's seat fully rearward and seat the child in an approved forward-facing child seat. Do not use a rearward-facing child seat - an inflating airbag could impact with the seat and cause serious injury.**

**Do not use a forward-facing child seat until the child using it is above the minimum weight of 9 kg and able to sit up unaided. Up to the age of two, a child's spine and neck are not sufficiently developed to avoid injury in a frontal impact.**

**Do not allow a baby or infant to be held or carried on the lap. The force of a crash can increase effective body weight by as much as thirty times, making it impossible to hold onto the child. At all times, children should be restrained in age and size appropriate child seats to reduce the risk of death or serious injury in a crash.**

**Children could be endangered in a crash if their child restraints are not properly secured in the vehicle. Always follow the instructions that accompany the child seat carefully.**

**Children typically require the use of a booster seat appropriate to their age and size, thereby enabling the seat belts to be properly fitted, reducing the risk of injury in a crash. Children could be endangered in a crash if their child restraints are not properly secured in the vehicle.**

**Do not use a child seat that hooks over the seatback. This type of seat cannot be satisfactorily secured and is unlikely to be safe for your child.**
